**Photoresponsive
Supramolecular Soft Materials
in Aqueous Media**

Shaoyu Chen

The work described in this thesis was carried out at the Stratingh Institute for Chemistry, University of Groningen, The Netherlands, and at the School of Textiles and Clothing, Jiangnan University, China.

This work was financially supported by the Netherlands Organization for Scientific Research (NWO-CW, NWO-Top Grant, ERC), the China Scholarship Council, National Natural Science Foundation of China, the Excellent Doctoral Cultivation Project of Jiangnan University

Photoresponsive Supramolecular Soft Materials in Aqueous Media

PhD thesis

to obtain the degree of PhD at the
University of Groningen
On the authority of the
Rector Magnificus prof. C. Wijmenga
and in accordance with
the decision by the College of Deans.

This thesis will be defended in public on

Friday 13 December 2019 at 09.00 hour

by

Shaoyu Chen

born on 06 June 1990
in Guangdong, China

Supervisors

Prof. B. L. Feringa

Prof. C. Wang

Co-supervisor

Dr. S. J. Wezenberg

Assessment committee

Prof. E. J. R. Sudhölter

Prof. P. Rudolf

Prof. W.R. Browne

Prof. P. Ma

rijksuniversiteit
 groningen

Photoresponsive Supramolecular Soft Materials in Aqueous Media

Proefschrift

ter verkrijging van de graad van doctor aan de
Rijksuniversiteit Groningen
op gezag van de
rector magnificus prof. dr. C. Wijmenga
en volgens besluit van het College voor Promoties.

De openbare verdediging zal plaatsvinden op
vrijdag 13 december 2019 om 09.00 uur

door

Shaoyu Chen

geboren op 06 juni 1990
te Guangdong, China

Promotores

Prof. dr. B. L. Feringa

Prof. dr. C. Wang

Copromotor

Dr. S. J. Wezenberg

Beoordelingscommissie

Prof. dr. E. J. R. Sudhölter

Prof. dr. P. Rudolf

Prof. dr. W.R. Browne

Prof. dr. P. Ma

Table of Content

Chapter 1	
Supramolecular Self-Assembly of Photoresponsive Molecular Amphiphiles in Aqueous Media.....	1
1.1 Introduction	3
1.2 Photoresponsive molecular amphiphiles	4
1.3 Dynamic functions of photoresponsive molecular amphiphiles at air-water interfaces	5
1.4 Functional supramolecular self-assembly of photoresponsive molecular amphiphiles in solutions	13
1.4.1 Isotropic self-assembly of photoresponsive molecular amphiphiles	14
1.4.2 Anisotropic self-assembly of photoresponsive molecular amphiphiles.....	25
1.5 Summary and outlook.....	31
1.6 Outline of this thesis	32
1.7 References	34
<hr/>	
Chapter 2	
Amphiphilic Azobenzene Doped Photoresponsive Foams.....	43
2.1 Introduction	45
2.2 Results and Discussion	46
2.2.1 Molecular design and synthesis	46
2.2.2 Isomerization analysis of NAA_{Cn}	47
2.2.3 Photoresponsive foams of NAA_{Cn} doped in SDS foaming system	51
2.3 Conclusions	55
2.4 Acknowledgments	55
2.5 Experimental Data	55
2.6 References	57
<hr/>	
Chapter 3	
Amphiphilic Nonionic Azobenzene Doped Photoresponsive Foams for a Recycled Pigment Coloring Approach.....	63
3.1 Introduction	65
3.2 Results and Discussion	67
3.2.1 Molecular design and synthesis	67
3.2.2 Photoisomerization of NAA_{PEG}	68
3.2.3 Photoresponsive foams of NAA_{PEG}	70
3.2.4 Fabric properties colored with different concentrations of pigment dispersion	73

3.2.5 Polyester fabric properties colored with the recycled pigment foam coloring process	77
3.3 Conclusions	78
3.4 Acknowledgments	79
3.5 Experimental Data	79
3.6 References	81

Chapter 4

Photoresponsive Foams from a Cationic Azobenzene Amphiphile (CAA_{C4}) for a Recycled Coloring Approach

4.1 Introduction	89
4.2 Results and Discussion	91
4.2.1 Molecular design and synthesis	91
4.2.2 Photoisomerization of CAA _{C4}	91
4.2.3 Thermal stability of CAA _{C4}	93
4.2.4 Foam properties of CAA _{C4}	95
4.2.5 Effects of CWPU dye on foam properties of CAA _{C4}	97
4.2.6 Cotton fabric properties colored with different concentrations of CWPU dye	98
4.2.7 Cotton fabric properties colored with the recycled foam coloring process	101
4.3 Conclusions	103
4.4 Acknowledgments	104
4.5 Experimental Data	103
4.6 References	106

Chapter 5

Fast Photoresponsive Foams from a Cationic Azobenzene Amphiphile (CAA_{C8})

5.1 Introduction	113
5.2 Results and Discussion	114
5.2.1 Molecular design and synthesis	114
5.2.2 Photoisomerization of CAA _{C8}	115
5.2.3 Surface activity of CAA _{C8}	117
5.2.4 Fast photoresponsive foams	119
5.3 Conclusions	122
5.4 Acknowledgments	123
5.5 Experimental Data	123
5.6 References	124

Chapter 6	
Supramolecular Assembly Transformations of a Molecular Motor Amphiphile Controls Macroscopic Foam Properties	131
6.1 Introduction	133
6.2 Results and Discussion	135
6.2.1 Molecular design and synthesis	135
6.2.2 Photoisomerization and thermal helix inversion steps to control packing parameters of MA	136
6.2.3 Supramolecular assembly transformation at microscopic length-scales.....	140
6.2.4 Macroscopic photoresponsive foam	143
6.3 Conclusions	148
6.4 Acknowledgments	148
6.5 Experimental Data	149
6.6 References	153
Chapter 7	
Biocompatible Macroscopic Strings of Motor Amphiphiles for Cell Growth	161
7.1 Introduction	163
7.2 Results and Discussion	164
7.2.1 Molecular design and synthesis	164
7.2.2 Photoisomerization of motor amphiphiles.....	166
7.2.3 Supramolecular assembly of motor amphiphiles.....	167
7.2.4 Biocompatibility and cell growth onto the macroscopic strings.....	171
7.3 Conclusions	173
7.4 Acknowledgments	173
7.5 Experimental Data	174
7.6 References	179
Summary	187
English summary	188
Nederlandse samenvatting	191
Chinese summary.....	194
Appendix	201
Appendix-Section A.....	202
Appendix-Section B.....	204
Appendix-Acknowledgements.....	208
