Long-term effects of large and small herbivores on plant diversity in a salt-marsh system

PhD thesis

to obtain the degree of PhD at the
University of Groningen
on the authority of the
Rector Magnificus Prof. C. Wijmenga
and in accordance with
the decision by the College of Deans.

This thesis will be defended in public on
Monday 27 January 2020 at 14:30 hours

by

Qingqing Chen

born on 1 July 1987
in Fujian, China

Supervisors

Prof. H. Olff

Prof. C. Smit

Assessment Committee

Prof. J.C.J.M. de Kroon

Prof. T.J. Bouma

Prof. J. van de Koppel

Contents

Chapter 1	General introduction	7
Chapter 2	Long-term management is needed for preserving plant diversity in a natural salt marsh	17
Chapter 3	Long-term non-trophic effects of large herbivores are underestimated	41
Chapter 4	Small herbivores slow down species loss up to 22 years but only at early successional stage	73
Chapter 5	Population differentiation via genotype selection under 22-year small herbivore exclusion at the early successional stage in a salt marsh	107
Chapter 6	Synthesis	135
	References	143
	Summary	153
	Samenvatting	159
	Acknowledgements	163
