Studies in animal models

Leonie Gouweleeuw

Neuroinflammation as common denominator in heart failure associated mental dysfunction

Studies in animal models

The studies described in this thesis were carried out at the department of neurobiology, part of the Groningen Institute for Evolutionary Life Sciences (GELIFES) at the University of Groningen.

The printing of this thesis was financially supported by the Groningen Graduate School for Science and Engineering and the University of Groningen Library.

Neuroinflammation as common denominator in heart failure associated mental dysfunction

Studies in animal models

Proefschrift

ter verkrijging van de graad van doctor aan de
Rijksuniversiteit Groningen
op gezag van de
rector magnificus prof. dr. C. Wijmenga
en volgens besluit van het College voor Promoties.

De openbare verdediging zal plaatsvinden op

vrijdag 17 april 2020 om 12.45 uur

door

Leonie Gouweleeuw

geboren op 22 oktober 1986
te 's-Gravenhage

Promotor

Prof. dr. U.L.M. Eisel

Copromotor

Dr. R.G. Schoemaker

Beoordelingscommissie

Prof. dr. M.J.H. Kas

Prof. dr. A.J. Kraneveld

Prof. dr. T. Jaarsma

Table of contents

Chapter 1

General introduction	7

Chapter 2

The role of neutrophil gelatinase associated lipocalin (NGAL) as biological constituent linking depression and cardiovascular disease.	21

Chapter 3

Evidence for neuroinflammation after myocardial infarction in a mouse model	49

Chapter 4

Sex specific associations between microglia activity and behaviour after cardiac surgery in rats	65

Chapter 5

Differences in the association between behavior and neutrophil gelatinase-associated lipocalin in male and female rats after coronary artery ligation.	81

Chapter 6

Neutrophil gelatinase-associated lipocalin and microglial activity are associated with distinct postoperative behavioral changes in rats.	109

Chapter 7

General discussion	123

Summary	138

Nederlandse samenvatting	144

Dankwoord	150

Curriculum Vitae	153

List of publications	154
