Celiac disease: from genetic variation to molecular culprits

PhD thesis

to obtain the degree of PhD at the
University of Groningen
on the authority of the
Rector Magnificus Prof. C. Wijmenga
and in accordance with
the decision by the College of Deans.

This thesis will be defended in public on

Wednesday 22 April 2020 at 11.00 hours

by

Maria Magdalena Zorro Manrique

born on 4 September 1979
in Puerto Wilches, Colombia

Supervisors

Prof. C. Wijmenga

Dr. S. Withoff

Co-supervisor

Dr. I.H. Jonkers

Assessment Committee

Prof. A. van den Berg

Prof. J.D. Laman

Prof. F. Koning

Paranymphs:

Kieu T.T. Le

Joram Mooiweer

Table of contents

Chapter 1	General introduction.	9
Chapter 2	The role of celiac disease associated protein <i>LPP</i> in intestinal barrier function.	21
Chapter 3	Systematic prioritization of candidate genes in disease loci identifies <i>TRAFD1</i> as a master regulator of IFN γ signalling in celiac disease.	43
Chapter 4	Tissue alarmins and adaptive cytokine induce dynamic and distinct transcriptional responses in tissue-resident intraepithelial cytotoxic T lymphocytes.	77
Chapter 5	Small and long regulatory RNAs in the immune system and immune diseases.	107
Chapter 6	Knockdown of the lncRNA <i>RP11-291B21.2</i> interferes with the activation of CD8 ⁺ T cells.	143
Chapter 7	Discussion.	171
Appendices	Summary.	189
	Sammenvatting	193
	Resumen.	197
	Acknowledgements.	201
	Curriculum Vitae.	204
	List of publications.	205
