Chronopharmacology:
**towards chronotherapy with high spatio-temporal
precision**

Dušan Kolarski

First edition, May 2020

The work described in this thesis was carried out at the Stratingh Institute for Chemistry, University of Groningen, The Netherlands.

The work was financially supported by the Netherlands Organization for Scientific Research (NWO-CW; TOP Grant NWO), the European Research Council and the Ministry of Education, Culture and Science.

Chronophotopharmacology: towards chronotherapy with high spatio-temporal precision

Proefschrift

ter verkrijging van de graad van doctor aan de
Rijksuniversiteit Groningen
op gezag van de
rector magnificus prof. dr. C. Wijmenga
en volgens besluit van het College voor Promoties.

De openbare verdediging zal plaatsvinden op

vrijdag 8 mei 2020 om 16.15 uur

Chronopharmacology: towards chronotherapy with high spatio-temporal precision

PhD thesis

to obtain the degree of PhD at the
University of Groningen
on the authority of the
Rector Magnificus Prof. C. Wijmenga
and in accordance with
the decision by the College of Deans.

This thesis will be defended in public on

Friday 8 May 2020 at 16.15 hours

by

Dedication

I dedicate this dissertation to my parents Vera and Petar. I hope that this achievement will complete the dream you had for me when you chose to give me the best education you could.

Posveta

Ovu doktorsku disertaciju posvećujem svojim roditeljima Veri i Petru. U nadi da će ovo postignuće ispuniti vaš san koji ste imali za mene kada ste mi pružili najbolje moguće školovanje.

“During the study, the work will encounter various difficulties and problems that need to be solved in order to make progress. Some of them might easily be solved, but some might take weeks or months to resolve, although all difficulties will eventually be overcome if one persists. If you persist and manage to solve a difficult problem, you will build confidence in yourself, which will empower you to solve further difficulties. Therefore, it is important to solve the first difficult problem that you encounter. If you give up once, you will probably give up the next time.”

Ryōji Noyori

Table of contents

Table of contents	1
Chapter 1 Introduction: circadian rhythm and photopharmacology	5
1.1 Circadian rhythm	6
1.2 Photopharmacology	20
1.3 Challenges for chronophotopharmacology	29
1.4 Aim and outline of this thesis	31
1.5 References	32
Chapter 2 Two-step-one-pot synthesis of visible-light-responsive 6-azopurines	39
2.1 Introduction	40
2.2 Results and Discussion	42
2.3 Conclusion	46
2.4 Experimental Section	47
2.5 References	67
Chapter 3 Modulation of CKIα activity and circadian period using green-light-responsive heteroaryl azobenzenes based on longdaysin	71
3.1 Introduction	72

3.2	Design and synthesis	72
3.3	Photochemical properties and chemical stability of azopurines	74
3.4	Modulation of biological activity with azopurines	80
3.5	Conclusion	83
3.6	Contribution	84
3.7	Experimental Section	85
3.8	References	88

Chapter 4	Reversible tuning of the circadian clock: long-term biological control with photopharmacology	91
------------------	--	-----------

4.1	Introduction	92
4.2	Results	95
4.3	Discussion	107
4.4	Contribution	109
4.5	Experimental section	109
4.6	References	132

Chapter 5	Towards light-induced circadian period modulation using acylhydrazone derivatives of LH14	137
------------------	--	------------

5.1	Introduction	138
5.2	<i>In vitro</i> kinase activity	145
5.3	Cellular assay	146
5.4	Effect of the methyl substituent	146
5.5	Conclusion and outlook	147
5.6	Contribution	148
5.7	Experimental section	148
5.8	References	161

Chapter 6 Controlling the Circadian Clock with High Temporal Resolution through Photodosing 163

6.1	Introduction	164
6.2	Results	165
6.3	Discussion	173
6.4	Contribution	174
6.5	Experimental section	175
6.6	References	189

Chapter 7 Photoswitchable CRY1 inhibitors as light-responsive modulators of the mammalian circadian clock 193

7.1	Introduction	194
7.2	Design and synthesis	195
7.3	Results	200
7.4	Conclusion	206
7.5	Contribution	207
7.6	Experimental section	207
7.7	References	220

Chapter 8 Appendices 223

8.1	Summary	225
8.2	Samenvatting	228
8.3	Sažetak	231
8.4	Popular summary	234
8.5	Populairwetenschappelijke samenvatting	236
8.6	Sažetak za širu javnost	239
8.7	Acknowledgement	244
8.8	Zahvalnica	250
