Prof. O. Weber

Prof. C.A.A.M. Withagen

Acknowledgments

The last four years have been exciting. Apart from getting married to the love of my life, I got the opportunity to pursue a PhD project which interested me deeply. I am very grateful for this opportunity and all the support I received from colleagues, friends, and family. In the following, I would like to thank a couple of people in particular.

First of all, I thank my supervisors, Machiel Mulder and Bert Scholtens, for their invaluable support. Your passion for the field was highly contagious. I very much enjoyed our meetings, which regularly featured intense discussions and a good dose of humor. Along the way, you were very engaging and did not stop throwing challenging in-depth and conceptual questions at me. You taught me to develop new ideas and to shelve bad ones. It is largely because of you, Machiel and Bert, that the past years seem to have flown by.

I am grateful for the opportunity to visit the University of Edinburgh Business School (UEBS) from January to May 2017. Special thanks go to Gbenga Ibikunle. GB, you were very supportive and kind, as well as genuinely inspiring to work with. I also thank all the PhD candidates and staff at UEBS for making the visit a truly memorable experience.

I am further indebted to my colleagues at the Faculty of Economics and Business (FEB) and the Centre for Energy Economics Research (CEER). You all contributed to a highly inspiring and enjoyable research environment. I especially thank Halit Gonenc for our pleasant collaboration in teaching and Lammertjan Dam for being a great co-author. A big thanks to my office mates Steffen Eriksen, Kenan Qiao, David Peng, and Tobias Grohmann. Steffen and Kenan, I will not forget the bad jokes and the sporadic moments of success enjoyed when beating you at table football. Also, you both taught me a lot. David and Tobias, thanks for the enjoyable conversations (sometimes in Dutch), your support, and the delicious and healthy nuts. Shan Ahmad, Ambrogio Dalò, Hermien Dijk, Jan Eise Fokkema, Fred Giesenow, Daan Hulshof, Nick Koning, Bert Kramer, Mart van Megen, Jos Offerein, Peter Perey, Anouk Schippers, Daniel Vullings, Rasmus Wiese, and Juliette de Wit, your company made the sometimes stressful work much more bearable and all the more worthwhile.

My thanks go out to SOM Research Institute for always being helpful and supportive. I am grateful to all the academics I had the opportunity to get in touch with at the following places: Norwegian School of Economics, Bergen, Norway (IAEE, June 2016); University of

Acknowledgments

Edinburgh Business School, UK (internal seminars, April–May 2017); University of Zurich, Switzerland (Oikos Finance Academy, September 2017); Ca' Foscari University of Venice, Italy (selected exchange, January 2018); Cass Business School, London, UK (conference on “Asset Management with Climate Risk”, on invitation, January 2018); IPAG Business School, Paris, France (ISEFI, May 2018 and May 2019), University of Groningen, The Netherlands (IAEE, June 2018, and internal seminars 2016–2019); Maastricht University, The Netherlands (GRASFI, September 2018); Vrije Universiteit Amsterdam, The Netherlands (seminar, February 2019); University of Oxford, UK (GRASFI, September 2019); and AG2R La Mondiale, Paris, France (FIR-PRI award ceremony, October 2019).

I thank the members of the assessment committee, Niels Hermes, Olaf Weber, and Cees Withagen, for their time and valuable comments.

I owe a debt of gratitude to my family and non-work friends. You have been a continuous source of joy and care. I am grateful for the support of my paranymphs, David Holwerda and Pieter van Delden. David, thanks for being a five-star B&B host.

Finally, special thanks go out to Emmy; your crazy love puts all things in perspective.

Arjan Trinks
