The unfolded protein response in glioblastoma stem cells: towards new targets for therapy

Proefschrift

ter verkrijging van de graad van doctor aan de
Rijksuniversiteit Groningen
op gezag van de
rector magnificus prof. dr. C. Wijmenga
en volgens besluit van het College voor Promoties.

De openbare verdediging zal plaatsvinden op

maandag 11 mei 2020 om 16:15 uur

door

Natalia M. Peñaranda Fajardo

geboren op 29 October 1988 te
Barrancabermeja, Colombia

Promotor

Prof. dr. F.A.E. Kruyt

Copromotor

dr. J. Meijer

The unfolded protein response in glioblastoma stem cells: towards new targets for therapy

Contents

Chapter 1	General Introduction and thesis outline	7
Chapter 2	The endoplasmic reticulum stress/ unfolded protein response in gliomagenesis, tumor progression and as a therapeutic target in Glioblastoma <i>Biochemical Pharmacology. 2016 Oct 15;118:1-8</i>	19
Chapter 3	ER stress and UPR activation in glioblastoma: identification of a noncanonical PERK mechanism regulating GBM stem cells through SOX2 modulation <i>Cell Death and Disease. 2019 Sep 18;10(10):690</i>	43
	Appendix: Immunohistochemical and digital image analyses of glucose transporter 1 (GLUT1) expression in relation to Unfolded Protein Response (UPR) protein expression in a Glioblastoma Tissue Microarray	87
Chapter 4	Exploration of genes involved in PERK-dependent control of GBM stem cells by comparative transcriptomic analysis <i>In preparation</i>	99
Chapter 5	The role of autophagy in ER stress-induced cytotoxicity in Glioblastoma neurospheres <i>In preparation</i>	125
Chapter 6	Summary, Discussion and Future Perspectives	145
Appendices	Samenvatting	160
	Acknowledgments	166
	About the author	169
	List of publications	171
