Host-pneumococcal interactions - from the lung to the brain

Jolien Seinen

The studies presented in this thesis were conducted at the Department of Medical Microbiology, University of Groningen and the Department of Critical Care, University Medical Center Groningen, the Netherlands and the Department of Molecular Genetics and Infection Biology, Interfaculty Institute for Genetics and Functional Genomics, University of Greifswald, Germany.

The work described in this thesis was financially supported by the Graduate School of Medical Sciences of the University of Groningen and the Deutsche Forschungsgemeinschaft Grant GRK 1870.

Printing of this thesis was financially supported by the Graduate School of Medical Sciences of the University of Groningen and the University of Groningen Library.

ISBN: 978-94-034-2760-7 (printed version)

ISBN: 978-94-034-2761-4 (electronic version)

CT scan of the lungs was kindly provided by Ronald Dob and Willem Dieperink

Cover and layout by: Douwe Oppewal, www.oppewal.nl

Host-pneumococcal interactions - from the lung to the brain

PhD thesis

to obtain the degree of PhD at the
University of Groningen
on the authority of the
Rector Magnificus Prof. C. Wijmenga
and in accordance with
the decision by the College of Deans

and

to obtain the degree of PhD at the
University of Greifswald
on the authority of the
Rector Magnificus Prof. J.E. Weber
and in accordance with
the decision by the Dean Prof. G. Kerth.

Double PhD degree

This thesis will be defended in public on

Monday 8 June 2020 at 14.30 hours

by

Jolien Seinen

born on 7 January 1989
in Heerenveen

Supervisors

Prof. J.M. van Dijk

Prof. S. Hammerschmidt

Prof. A.M.G.A. de Smet

Co-supervisor

Dr. W. Dieperink

Assessment committee

Prof. M. Schmidt

Prof. P. Heeringa

Prof. D. Becher

Prof. P. F. Zipfel

Paranymphs

Dr. L. M. Palma Medina

Dr. F. Romero Pastrana

Table of contents

Chapter 1	General introduction and scope of this thesis	9
Chapter 2	Heterogeneous antimicrobial activity in broncho-alveolar aspirates from mechanically ventilated Intensive Care Unit patients <i>Virulence 2019, 10: 879-891</i>	23
Chapter 3	Sputum proteome signatures of mechanically ventilated Intensive Care Unit patients distinguish samples with or without antimicrobial activity <i>Submitted</i>	47
Chapter 4	Modular architecture and unique teichoic acid recognition features of choline-binding protein L (CbpL) contributing to pneumococcal pathogenesis <i>Scientific Reports 2016, 6: 38094</i>	77
Chapter 5	How does <i>Streptococcus pneumoniae</i> invade the brain? <i>Trends in Microbiology 2016, 24: 307-315</i>	111
Chapter 6	Summary and future perspectives	127
Chapter 7	Nederlandse samenvatting	135
	Biography	143
	List of publications	144
	Acknowledgements – Dankwoord	145
