Role of hepatic glucose signaling in the development of liver disease

PhD thesis

to obtain the degree of PhD at the
University of Groningen
on the authority of the
Rector Magnificus Prof. C. Wijmenga
and in accordance with
the decision by the College of Deans.

This thesis will be defended in public on

Wednesday 10 June 2020 at 9.00 hours

by

Yu Lei

born on 24 February 1989
in Chongqing, China

Promotores

Prof. dr. F. Kuipers

Prof. dr. J. Gu

Co-Promotor

Dr. M.H. Oosterveer

Assessment Committee

Prof. dr. C.J. de Vries

Prof. dr. P. Olinga

Prof. dr. A.J. Moshage

Content

Chapter 1	General Introduction	7
Chapter 2	Hepatic ChREBP activation limits NAFLD development in a mouse model for Glycogen Storage Disease type Ia	29
Chapter 3	Glucose-6-phosphate regulates hepatic bile acid synthesis in mice	61
Chapter 4	ChREBP promotes hepatocyte proliferation <i>in vitro</i> but protects against oncogenic hepatocyte transformation in a mouse model for Glycogen Storage Disease type 1a	93
Chapter 5	Glucose-6-phosphatase deficiency shifts the balance between hepatocyte hyperplasia and hypertrophy during liver regeneration	125
Chapter 6	Expressions of Carbohydrate Response Element Binding Protein and Glucose Transporters in Liver Cancer and Clinical Significance	143
Chapter 7	General Discussion	161
Appendices	English summary	181
	Nederlandse samenvatting	185
	Acknowledgements	189
	Biography	193
	List of publications	195
