***In silico* patient**

Systems medicine approach to inborn
errors of metabolism

Agnieszka Barbara Węgrzyn

The research presented in this thesis was carried out at the Department of Pediatrics, Center for Liver and Metabolic Diseases, University of Groningen. The research described in this thesis was funded by the Marie Curie Initial Training Networks (ITN) action PerFuMe [project number 316723] and University Medical Center Groningen. The research group participates in the Groningen Institute for Drug Exploration (GUIDE).

Financial support for printing of this thesis was received from:
the University Library
the Graduate School of Medical Sciences
the Groningen Institute for Drug Exploration (GUIDE)

In silico patient

Systems medicine approach to inborn errors of metabolism

PhD thesis

to obtain the degree of PhD at the
University of Groningen
on the authority of the
Rector Magnificus Prof. C. Wijmenga
and in accordance with
the decision by the College of Deans.

This thesis will be defended in public on

Monday 15 June 2020 at 11.00 hours

by

Agnieszka Barbara Węgrzyn

born on 21 July 1988
in Tuchów, Poland

Supervisors

Prof. B.M. Bakker

Prof. V. Martins Dos Santos

Assessment Committee

Prof. I.J. van der Klei

Prof. H.R. Waterham

Prof. H.V. Westerhoff

Table of contents

Chapter 1	General introduction and outline of the thesis	7
Chapter 2	Cofactors revisited – predicting the impact of flavoprotein-related diseases on a genome scale	31
Chapter 3	Fibroblast-specific genome-scale modelling predicts an imbalance in amino acid metabolism in Refsum disease	69
Chapter 4	Phenylketonuria: modelling cerebral amino acid and neurotransmitter metabolism	107
Chapter 5	General discussion	159
Appendices		
	I. Summary	173
	II. Samenvatting	178
	III. Streszczenie	182
	IV. Acknowledgements	186
	V. Biography	191
	VI. List of publications	192
	VII. Authors' affiliations	193
	VIII. Portfolio	194
	IX. Abbreviations	195
