Dissecting the temporal dynamics
of eukaryotic metabolism
in single cells

Vakil Takhaveev

The work published in this thesis was carried out in the research group Molecular Systems Biology of the Groningen Biomolecular Science and Biotechnology Institute (GBB) of the University of Groningen in the Netherlands. The research was financially supported by the European Union's Horizon 2020 research and innovation programme under the Marie Skłodowska-Curie grant agreement No 642738.

Dissecting the temporal dynamics of eukaryotic metabolism in single cells

PhD thesis

to obtain the degree of PhD at the
University of Groningen
on the authority of the
Rector Magnificus Prof. C. Wijmenga
and in accordance with
the decision by the College of Deans.

This thesis will be defended in public on

Monday 29 June 2020 at 18.00 hours

by

Vakil Takhaveev

born on 22 September 1993
in Kovriga, Russia

Supervisors

Prof. M. Heinemann

Prof. P.J.M. van Haastert

Assessment Committee

Prof. B. Teusink

Prof. I.J. van der Klei

Prof. B. Poolman

To granny Antonida,
mother Lyudmila
and wife Alisa

Contents

Chapter 1

Metabolic heterogeneity in clonal microbial populations	9
Aim and outline of this thesis	20

Chapter 2

Temporal segregation among biosynthetic processes is responsible for metabolic oscillations during eukaryotic cell cycle	31
--	----

Chapter 3

A pyruvate FRET-sensor used in animal cells does not function in <i>Saccharomyces cerevisiae</i> but exposes an oscillatory behaviour of metabolism	105
---	-----

Chapter 4

A synthetic RNA-based biosensor for fructose-1,6-bisphosphate that reports glycolytic flux	133
--	-----

Chapter 5

Proposals for exploring and exploiting the discovered metabolic dynamics and the developed single-cell-level tools	197
--	-----

Addendum

Nederlandse samenvatting	208
Curriculum Vitae	211
List of publications and manuscripts	212
Conferences, science communication, grant application and student supervision	213
