CONTENTS

Part 1.	Introduction	11
Chapter 1	General introduction	13
Chapter 2	The burden and costs of sepsis and reimbursement of its treatment in a developing country: An observational study on focal infections in Indonesia	21
Part 2.	Prophylactic antibiotics for surgical site infection prevention	43
Chapter 3	Prevention of surgical site infections: A systematic review of cost analyses in the use of prophylactic antibiotics	45
Chapter 4	The impacts of deep surgical site infections on readmissions, length of stay, and costs: A matched case-control cohort study in an academic hospital in the Netherlands	81
Part 3.	Empirical antibiotics for hospitalized community-acquired pneumonia	97
Chapter 5	Multidrug-resistant infections among hospitalized adults with community-acquired pneumonia in an Indonesian tertiary referral hospital	99
Chapter 6	Cost-effectiveness of culture-based versus empirical antibiotic treatment for hospitalized adults with community-acquired pneumonia in Indonesia: A real-world patient-database study	119
Part 4.	Discussion	143
Chapter 7	General discussion and future perspectives	145
Chapter 8	Appendix: Laboratory findings as predictors of sepsis mortality among adult patients in a general hospital in Indonesia	155
Addendum		163
	Summary	164
	Samenvatting	168
	Ringkasan	172
