TOWARDS EX VIVO REPAIR OF DAMAGED DONOR KIDNEYS

Merel Bente Frederike Pool

rijksuniversiteit
 groningen

Towards ex vivo repair of damaged donor kidneys

Proefschrift

ter verkrijging van de graad van doctor aan de
Rijksuniversiteit Groningen
op gezag van de
rector magnificus prof. dr. C. Wijmenga
en volgens besluit van het College voor Promoties.

De openbare verdediging zal plaatsvinden op

dinsdag 25 augustus 2020 om 16.15 uur

door

Merel Bente Frederike Pool

geboren op 9 december 1992
te Groningen

TABLE OF CONTENTS

Chapter 1	Introduction	7
Part A	Cellular therapy with mesenchymal stromal cells during normothermic machine perfusion	17
Chapter 2	Reparative and regenerative effects of mesenchymal stromal cells - promising potential for kidney transplantation?	19
Chapter 3	Infusing mesenchymal stromal cells into porcine kidneys during normothermic machine perfusion: Intact MSCs can be traced and localised to glomeruli	45
Chapter 4	Treating ischaemically damaged porcine kidneys with bone-marrow and adipose tissue derived mesenchymal stromal cells during ex vivo normothermic machine perfusion	63
Chapter 5	MSC treatment during ex vivo normothermic machine perfusion: First posttransplant results in a porcine kidney autotransplantation study	87
Part B	Towards the optimisation of normothermic machine perfusion: A focus on the perfusion solution	117
Chapter 6	Ex-vivo normothermic kidney perfusion: Which solution is most suitable for prolonged perfusion?	119
Chapter 7	Normothermic machine perfusion of ischaemically damaged porcine kidneys with autologous, allogeneic porcine and human red blood cells	143
Chapter 8	Ex-vivo kidney perfusion with synthetic haemoglobin-based oxygen carriers, red blood cells or no oxygen carrier	167
Chapter 9	Summary	193
	General discussion	196
	Future perspectives	199
Chapter 10	Samenvatting	205
	List of publications	209
	List of contributing authors	210
	Dankwoord	212
	Biografie	216
