Glycogen Storage Disease type IIIa

Towards precision medicine

Proefschrift

ter verkrijging van de graad van doctor aan de
Rijksuniversiteit Groningen
op gezag van de
rector magnificus prof. dr. C. Wijmenga
en volgens besluit van het College voor Promoties.

De openbare verdediging zal plaatsvinden op

woensdag 6 mei 2020 om 11:00 uur

door

Irene Jolanda Hoogeveen

geboren op 17 juni 1992
te Gaasterlân-Sleat

TABLE OF CONTENTS

Chapter 1	Introduction and thesis outline	9
Chapter 2	Natural history of GSDIIIa	
a.	Glycogen storage disease type III: diagnosis, genotype, management, clinical course and outcome. <i>Journal of Inherited Metabolic Disease</i>	21
Chapter 3	Follow-up and monitoring of the individual GSDIIIa patient	
a.	Normoglycemic ketonemia as biochemical presentation in ketotic glycogen storage disease. <i>JIMD reports</i>	37
b.	A preliminary study of telemedicine for patients with hepatic glycogen storage disease and their healthcare providers: from bedside to home site monitoring. <i>Journal of Inherited Metabolic Disease</i>	49
c.	A generic emergency protocol for patients with inborn errors of metabolism causing fasting intolerance: a retrospective, single-center chart review of 128 patients. <i>Submitted</i>	65
Chapter 4	Alternative composition of - and energy substrates in dietary management	
a.	Dietary lipids in hepatic glycogen storage diseases: a systematic literature study, case studies and future recommendations. <i>Journal of Inherited Metabolic Disease</i>	85
b.	Effects of acute nutritional ketosis during exercise in adults with glycogen storage disease type IIIa are phenotype-specific: an investigator-initiated, randomized, crossover study. <i>Submitted</i>	135
Chapter 5	General discussion and future perspectives	163
Appendices	Summary	184
	Samenvatting voor de niet-medicus	187
	Dankwoord	191
	About the author	196
	Contribution to the field	197
