Antidepressant treatment during pregnancy: for better or worse?

Neurodevelopmental outcomes in rat offspring

Proefschrift

ter verkrijging van de graad van doctor aan de
Rijksuniversiteit Groningen
op gezag van de
rector magnificus prof. dr. C. Wijmenga
en volgens besluit van het College voor Promoties.

De openbare verdediging zal plaatsvinden op

vrijdag 4 september 2020 om 16.15 uur

door

Danielle Josephina Houwing

geboren op 10 januari 1990
te Arnhem

Promotores

Prof. dr. J.D.A. Olivier

Prof. dr. M.J.H. Kas

Copromotor

Dr. S.F. de Boer

Beoordelingscommissie

Prof. dr. J.R. Homberg

Prof. dr. L.J.M.J. Vanderschuren

Prof. dr. G. van Dijk

To my family

CONTENTS

Chapter 1	General introduction	9
Chapter 2	Perinatal fluoxetine exposure disrupts the circadian response to a phase-shifting challenge in female rats	39
Chapter 3	Perinatal fluoxetine exposure changes social and stress-coping behavior in adult rats housed in a seminatural environment	67
Chapter 4	Maternal separation induces anhedonia in female heterozygous serotonin transporter knockout rats	109
Chapter 5	Subjecting dams to early life stress and perinatal fluoxetine treatment differentially alters social behavior in young and adult rat offspring	125
Chapter 6	Perinatal fluoxetine treatment and dams' early life stress history have opposite effects on aggressive behavior while having little impact on sexual behavior of male rat offspring	157
Chapter 7	Perinatal fluoxetine treatment and dams' early life stress history alter affective behavior in rat offspring depending on serotonin transporter genotype and sex	181
Chapter 8	General discussion	205
Appendix I	English summary	238
Appendix II	Nederlandse samenvatting	248
Appendix III	Dankwoord	260
Appendix IV	About the author	266
Appendix V	List of publications	268
