In the name of Allah, the Most Gracious, the Most Merciful

I had enjoyed my career in several private companies as an accountant until 2009, when I switched my path to be a full-time academic staff. Until that moment, taking a doctoral study abroad had never crossed my mind. However, the academic atmosphere encouraged me to go for a PhD scholarship. Praise be to Allah the Almighty, that my scholarship application (the Netherlands Fellowship Programme - NFP) was approved by Nuffic. Big thanks to NFP, a scholarship programme funded by the Dutch Ministry of Foreign Affairs, for its financial support, which helped me to manage my life during my study in the Netherlands and during my field study in Jakarta.

Completing a PhD trajectory was a long long journey for me. I had no experience as a researcher when I first arrived in Groningen. I felt that writing a good academic paper was so challenging. Nevertheless, I was very lucky to be surrounded by three genius and generous supervisors. First and foremost, I would like to express my great appreciation to Professor Ronald Holzhaacker who opened the door by giving me a precious opportunity to pursue my doctoral degree at the University of Groningen. I never thought that I could broaden my perspective. He gave me a lot of insights and different points of view for my dissertation. He occasionally invited and entertained us (the SInGA members) at his home in Groningen. Moreover, he monitored me regularly by visiting Jakarta, introduced me to various notable persons, and more importantly motivated me to remain being optimistic.

My sincere gratitude to Professor Niels Hermes who not only encouraged me to finish my work on time, but also provided related references to my papers. Honestly, at times I felt that I was not able to fulfill his minimum requirements. However, step by step he mentored me patiently and guided me persistently. He frequently sent feedback and suggestions in weekends. No matter how busy he was, he always gave me constructive comments, which I will never forget. Every single comment of his was simply superb.

Many things I have learned from him, such as scholarly professionalism, humbleness, simplicity, parenting, and many more. He is not only a great guru, but also a nice person to discuss with.

I am also indebted to Professor Sidharta Utama, my supervisor at Universitas Indonesia, who shared corporate governance cases and practices from Indonesia. I was engrossed in discussing with him as he knows much about the real implementation of corporate governance in Indonesia. He also introduced me to the Indonesian Institute for Corporate Directorship (IICD) for gaining data on the ASEAN Corporate Governance Scorecard (ACGS). In addition, I am very grateful for his valuable comments and suggestions particularly for chapters 3 and 5.

Related to IICD, I would like to thank to Ms. Vita Diani as Executive Director of IICD who supplied me with the detailed corporate governance scorecards. Without her kind help, chapter 5 would never have been completed.

I would also like to say thank you to the Indonesian Institute of Certified Public Accountants (IICPA) who gave me access that enabled me to distribute the questionnaires to its members. Chapter 3 would not have been possible without the help of Indonesian public accountants. Special thanks to Mr. Tarkosunaryo, MBA, CPA, President of IICPA (IAPI) who allowed me to contribute at the Certification Division. I have gained many insights from Mr. Tarko regarding auditing issues in Indonesia.

Much appreciation is given to the members of the assessment committee i.e., Professor Herman Hoen, Professor Trond Randøy, and Professor Reggy Hooghiemstra. Thank you for reading, assessing, and giving thoughtful suggestions for my manuscript.

I would also like to express my gratitude to Marijke Wubbolts for her kind assistance from the beginning of my PhD journey to the end of the journey. Many thanks also go to Hans Stavast who managed all matters related to my scholarship funding.

I want to express my credit to the Spirit Indonesia Groningen (SInGa) members consisting of Kang Tatang Muttaqin, Mas Taufiq Hidayat, Laksmi Kusumawati, Mala Sondang, Suwatin Miharti, Kuswanto, Annisa Paramita, Titissari Rumbogo, Yoga

Permana, Tri Efriandi, Isti Hidayati, and Petrus Farneubun. They always encouraged each other to finish their study, especially during hard times.

I would like to extend my grateful thanks to Ronny who was very helpful during ups and downs, cleaning and processing data, and brainstorming econometrics issues. We talked not only about how to finish the dissertation, but also about how to fix our bikes.

I missed my beloved friends around Harmonie complex/ *Academie Gebouw*: Stanati, Aynur Erde, Stefan Baack, Alisa Van der Haar, Yu Sun, Yingruo Wang, Joëlle Swart, Yara Marusyk. Thank you for sharing and having fun.

Thank you to Indonesian community in Groningen, especially Isti, Yassaroh, Fitrilia, Nahdia, Nuril, Achmad Suryadi, Icha, and Ali Syari'ati who assisted me in preparing the defense ceremony; Oom Yon-Tante Indah, Bude Ari-Oom Herman, Mbak Lia-Mas Yayok, Oom Rudie, Oom Archi-Tante Merry, Uwak Asiyah-Oom Menno, Bude Nunung. To all PPIG-ers Irawaty, Amak, Tiur, Kadek, Acul, Elda, Amirah, Angela, Putri, Doti, Karina, Nur Qom, Desti, Iging, Didik, Adhiyat, Radit, Nia, Ali, Ima, Ira S., Vera, Rosyta, Pak Asmoro, and others.

Last but not least, I am very grateful to my parents and my family who have continuously supported me throughout the PhD life. Most importantly, my sincere thanks go to my handsome boy, Humam Dawa. As a mother, I felt guilty that I was thousands of miles away from him when he faced the junior high school and senior high school national exams. I also apologised that I was unable to cuddle him when he was sick. I am very proud of him for being strong and courageous.
