G23 peptide-mediated delivery of biodegradable nanocarriers across an *in vitro* blood-brain barrier model

Edwin de Jong

2020

The research presented in this thesis was conducted at the Department of Cell Biology and the Department of Biomedical Engineering, Faculty of Medical Sciences, University Medical Center Groningen, University of Groningen, the Netherlands.

The work in this thesis is part of the NWO Talent Programme Vidi, awarded to Dr. I.S. Zuhorn, with project number 12950, which is financed by the Dutch Research Council (NWO-TTW).

The author acknowledges the financial support for printing of this thesis by the Graduate School of Medical Sciences of the University of Groningen.

G23 peptide-mediated delivery of biodegradable nanocarriers across an *in vitro* blood-brain barrier model

Proefschrift

ter verkrijging van de graad van doctor aan de
Rijksuniversiteit Groningen
op gezag van de
rector magnificus prof. dr. C. Wijmenga
en volgens besluit van het College voor Promoties.

De openbare verdediging zal plaatsvinden op

woensdag 23 september 2020 om 14.30 uur

door

Edwin de Jong

geboren op 18 augustus 1987
te Opsterland

CONTENTS

Chapter 1	General introduction and scope of the thesis	11
Chapter 2	Robust formation of biodegradable polymersomes by direct hydration	25
Chapter 3	A filter-free blood-brain barrier model to quantitatively study transendothelial delivery of nanoparticles by fluorescence spectroscopy	43
Chapter 4	THR transferrin receptor-targeting peptide is ineffective in promoting transcytosis of PEG-P(CL-g-TMC) polymersomes across the blood-brain barrier	65
Chapter 5	Cell-penetrating peptide characteristics of the G23 peptide	79
Chapter 6	Summary and perspectives	97
	Nederlandse samenvatting	105
	Dankwoord	111
	List of publications	115
