When well begun is half done

How the adoption of sustainable energy technologies can lead to sustainable use of the technologies and other pro-environmental behaviours

Annemijn Maron Peters

This thesis was supported by the Uncertainty Reduction in Smart Energy Systems (URSES) research program funded by the Dutch organization for scientific research (NWO). The research has been conducted within the project Realizing the smart grid: aligning consumer behaviour with technological opportunities (SMARTER) with grant number 408-13-009.

Financial support for the printing of this thesis was received from the University of Groningen and the Kurt Lewin Institute.
