Precipitate evolution in grain oriented electrical steel and high strength low alloy steel

Xukai Zhang

The work presented in this thesis was performed in the Nanostructured Materials and Interfaces group of the Zernike Institute for Advanced Materials at University of Groningen, The Netherlands.

This research was carried out under project number F41.5.15566 in the framework of the Partnership Program of the Materials innovation institute M2i (www.m2i.nl) and the Foundation for Fundamental Research on Matter (FOM) (www.fom.nl), which is part of the Netherlands Organization for Scientific Research (www.nwo.nl).

Precipitate evolution in grain oriented electrical steel and high strength low alloy steel

PhD thesis

to obtain the degree of PhD at the
University of Groningen
on the authority of the
Rector Magnificus Prof. C. Wijmenga
and in accordance with
the decision by the College of Deans.

This thesis will be defended in public on
Friday 25 September 2020 at 11:00 hours

by

Xukai Zhang

born on 22 June 1991
in Hebei, China

Supervisors

Prof. B.J. Kooi

Prof. G. Palasantzas

Assessment Committee

Prof. Y. Pei

Prof. J. Sietsma

Prof. G. Dehm

Table of Contents

Chapter 1 General introduction	5
1.1 Precipitates	6
1.2 Grain oriented (GO) electrical steel.....	9
1.3 High strength low alloy (HSLA) steels	12
1.4 Thesis outline.....	15
1.5 References	16
Chapter 2 Experimental	21
2.1 Materials	21
2.1.1 GO electrical steel	21
2.1.2 HSLA steel	21
2.2 VLM	22
2.3 SEM.....	22
2.4 EBSD	24
2.5 TEM.....	25
2.5.1 Electrochemical polishing	26
2.5.2 FIB	26
2.5.3 Carbon replica extraction	27
2.5.4 S/TEM observation	29
2.6 Matrix dissolution.....	31
2.7 SANS.....	32
2.8 Vickers hardness measurement	33
2.9 Tensile test.....	33
2.10 References	34

Chapter 3 Precipitate evolution in grain oriented electrical steel during high temperature coil annealing 37

3.1 Introduction	37
3.2 Experimental.....	38
3.3 Results	39
3.3.1 Overview and type I precipitates	39
3.3.2 Type II precipitates.....	41
3.3.3 Type III precipitates	46
3.3.4 MatCalc phase simulation	49
3.3.5 Grain size evolution	50
3.4. Discussion.....	50
3.4.1 Origin of high and low number density areas of type II (AlN-based) precipitates	50
3.4.2 Evolution of AlN-based precipitates	52
3.4.3 Dissolution of Cu_{2-x}S	53
3.4.4 Role of Cu in precipitation	54
3.4.5 Effects of precipitates on secondary recrystallization	55
3.4.6 Secondary recrystallization mechanism	57
3.5 Conclusions	58
3.6 References	59
3.7 Supplementary material.....	62

Chapter 4 Microstructure, precipitate and property evolution in cold-rolled Ti-V high strength low alloy steel 65

4.1 Introduction	65
4.2 Experimental.....	67
4.3 Results	67
4.3.1 Visible light microscopy	67

4.3.2 Electron microscopy	68
4.3.3 Matrix dissolution	73
4.3.4 SANS	75
4.3.5 Hardness evolution	78
4.4 Discussion.....	79
4.4.1 Precipitate quantification methods comparison.....	79
4.4.2 Precipitate evolution.....	82
4.4.3 Hardness evolution	83
4.5 Conclusions	84
4.6 References	85
4.7 Supplementary material.....	89
Chapter 5 Recrystallization kinetics and texture evolution of cold rolled Ti-V high strength low alloy steel	95
5.1 Introduction	95
5.2 Experimental.....	96
5.3 Results	96
5.3.1 EBSD measurement and GND density.....	96
5.3.2 Recrystallization kinetics	100
5.3.3 Texture evolution	103
5.4 Discussion.....	105
5.4.1 Avrami exponent n	105
5.4.2 Effect of precipitates on recovery and recrystallization	107
5.5 Conclusions	108
5.6 References	108
Chapter 6 Continuous annealing of cold-rolled Ti-V high strength low alloy steel: Early stage precipitation and recrystallization behavior ..	111
6.1 Introduction	111

6.2 Experimental.....	112
6.3 Results	113
6.3.1 Transmission Electron Microscopy	113
6.3.2 Matrix dissolution	117
6.3.3 Recrystallization.....	119
6.3.4 Mechanical properties	122
6.4. Discussion.....	123
6.4.1 Precipitation behavior	123
6.4.2 Strengthening mechanisms.....	125
6.4.3 Comparison of recrystallization driving force and Zener pinning force..	127
6.4.4 Effect of soaking temperature and time on mechanical properties.....	128
6.5 Conclusions	128
6.6 References	129
6.7 Supplementary material.....	132
Chapter 7 Summary and Outlook	133
7.1 Summary.....	133
7.1.1 GO electrical steel	133
7.1.2 HSLA steel	133
7.2 Outlook	135
7.2.1 GO electrical steel	135
7.2.2 HSLA steel	136
Chapter 8 Samenvatting.....	137
8.1 GO elektrisch staal.....	137
8.2 HSLA staal	137
List of Publications.....	141
Acknowledgements.....	143
