The research presented in this thesis was performed in the department of Nanomedicine and Drug Targeting at the Groningen Research Institute of Pharmacy (GRIP), University of Groningen, the Netherlands, and financially supported by GRIP and partly by the European Research Council (ERC) under the European Union's Horizon 2020 research and innovation programme under grant agreement N° 637614 (NanoPaths). Printing of this thesis was financially supported by the University Library and the Graduate School of Science and Engineering, Faculty of Science and Engineering, University of Groningen, the Netherlands

Exploiting the Biomolecular Corona of Nanocarriers for Targeted Drug Delivery to Endothelial Cells

PhD Thesis

to obtain the degree of PhD at the
University of Groningen
on the authority of the
Rector Magnificus Prof. C. Wijmenga
and in accordance with
the decision by the College of Deans.

This thesis will be defended in public on

Monday 5 October 2020 at 11.00 hours

by

Aldy Aliyandi

born on 2 December 1991
in Bandung, Indonesia

Supervisors

Prof. A. Salvati

Prof. I. S. Zuhorn

Assessment Committee

Prof. W. Parak

Prof. G. Molema

Prof. H. W. Frijlink

Table of Contents

Chapter 1. General Introduction and Aim of the Thesis.....	9
1.1 Nanomedicine.....	10
1.2 Endothelial cell barriers in nanomedicine.....	18
1.3 Aim of the thesis.....	20
References.....	24
Chapter 2. Disentangling Biomolecular Corona Interactions with Cell Receptors and Implications for Targeting of Nanomedicines	33
2.1 Introduction.....	34
2.2 The role of receptors in nanoparticle uptake.....	36
2.3 The role of the biomolecular corona in nanoparticle uptake	37
2.4 Methods to elucidate nanoparticle biomolecular corona-receptor interactions.....	40
2.5 Conclusions and future perspectives	49
References.....	51
Chapter 3. Effect of the Development of a Cell Barrier on Nanoparticle Uptake in Endothelial Cells	57
3.1 Introduction.....	58
3.2 Materials and methods	60
3.3 Results and discussion.....	67
3.4 Conclusions.....	78
Acknowledgements.....	79
References.....	81
Supplementary Information.....	88
Chapter 4. Effect of Endothelial Cell Heterogeneity on Nanoparticle Uptake.....	113
4.1 Introduction.....	114
4.2 Materials and methods	116
4.3 Results.....	121
4.4 Discussion	128
4.5 Conclusions.....	132
Acknowledgements.....	132
References.....	134
Supplementary Information.....	139
Chapter 5. Correlating Corona Composition and Cellular Uptake to Discover Proteins Directing Nanoparticles into Cells.....	145

5.1	Introduction.....	146
5.2	Materials and methods	148
5.3	Results and discussion	154
5.4	Conclusions.....	164
	Acknowledgements.....	165
	References.....	167
	Supplementary Information.....	171
Chapter 6. Exploiting the Protein Corona to Identify Receptors for Targeting of Nanocarriers.....		179
6.1	Introduction.....	180
6.2	Materials and methods	182
6.3	Results and discussion	188
6.4	Conclusions.....	202
	Acknowledgements.....	203
	References.....	205
	Supplementary Information.....	209
Chapter 7. General Discussion and Future Perspectives		227
	References.....	238
Nederlandse Samenvatting		240
Acknowledgements		248
