Table of contents

Chapter 1	General introduction and thesis outline	9
Chapter 2	Associations between tricuspid annular plane systolic excursion to reflect right ventricular function and acute kidney injury in critically ill patients: a SICS-I sub-study	17
Chapter 3	Clinical examination findings as predictors of acute kidney injury in critically ill patients	35
Chapter 4	Observational Study Protocol for Repeated Clinical Examination and Critical Care Ultrasonography within the Simple Intensive Care Studies	53
Chapter 5	Different applications of the KDIGO criteria for AKI lead to different incidences in critically ill patients: a post-hoc analysis from the prospective observational SICS-II study	69
Chapter 6	Diagnostic accuracy of arterial and venous renal Doppler assessment for acute kidney injury in critically ill patients: a prospective study	93
Chapter 7	Venous congestion and acute kidney injury in ICU patients: The Simple Intensive Care Studies-II	111
Chapter 8	Two subphenotypes of septic acute kidney injury are associated with different 90-day mortality and renal recovery	131
Chapter 9	Burden of Acute Kidney Injury and 90-day mortality in critically ill patients	159
Chapter 10		177
	Summary	179
	General discussion	181
	Future perspectives	185
Chapter 11		189
	Nederlandse samenvatting	191
	List of publications and Submitted papers	195
	About the author	199
	Dankwoord	201
