Structural plasticity of the social brain

Social stress-induced adaptations in dendritic remodeling and
 behavior

PhD thesis

to obtain the degree of PhD at the
 University of Groningen
 on the authority of the
 Rector Magnificus Prof. C. Wijmenga
 and in accordance with
 the decision by the College of Deans.

This thesis will be defended in public on

Friday 9 October 2020 at 16.15 hours

by

Deepika Bhawanji Patel

born on 6 September 1990
 in Nagpur, India

Supervisors

Prof. M.J.H. Kas

Prof. S. Chattarji

Co-supervisor

Dr. B. Buwalda

Assessment Committee

Prof. G. van Dijk

Prof. H. Kessels

Prof. S. Spijker

Who made me what I am...*

CONTENTS

Chapter	Content	Page
1	General introduction and thesis overview	1
2	Repeated social stress leads to contrasting patterns of structural plasticity in the amygdala and hippocampus	19
3	Single exposure to social defeat or immobilization stress fails to induce lasting alterations in general anxiety and hippocampal neurogenesis in Wistar and wild-type Groningen rats	37
4	Repeated victorious and defeat experiences induce similar dendritic spine remodeling in hippocampus, amygdala and prefrontal cortex of rats	53
5	Decreased spine density in posterodorsal medial amygdala neurons of proactive coping rats	63
6	Sensory contact model induces differential expression of phosphorylated cofilin and cofilin proteins in dorsal hippocampus and amygdala in reactive and proactive WTG rats	75
7	Establishment of the social hierarchy in wild-type Groningen rats using the visible burrow system-a model of chronic social stress?	95
8	Social defeat of male intruder rats in a mixed-sex social colony as an alternative for the resident-intruder paradigm	117
9	General Discussion	131
	References	141
	English Summary	165
	Nederlandse Samenvatting	173
