Metabolic and mitogenic functions of fibroblast growth factor 1

The research described in this thesis was carried out at the Laboratory of Pediatrics (Head: prof. dr. F. Kuipers), Section Molecular Metabolism and Nutrition, University Medical Center Groningen, The Netherlands. The research was funded by grants from the Dutch Diabetes Foundation (grant 2012.00.1537 to J.W.J.), The Netherlands Organization for Scientific Research (VIDI grant 016.126.338 to J.W.J. and VICI grant 016.176.640 to J.W.J.), the De Cock Stichting, and European Foundation for the Study of Diabetes (award supported by EFSD/Novo Nordisk). The printing of this thesis was financially supported by the University of Groningen, the University Medical Center Groningen, and the Groningen University Institute for Drug Exploration.

Cover design: by Dicky Struik created with BioRender.com (*front: human FGF1 at 1.10Å*)

ISBN (print): 978-94-034-2879-6

ISBN (online): 978-94-034-2880-2

Metabolic and mitogenic functions of fibroblast growth factor 1

Proefschrift

ter verkrijging van de graad van doctor aan de
Rijksuniversiteit Groningen
op gezag van de
rector magnificus prof. dr. C. Wijmenga
en volgens besluit van het College voor Promoties.

De openbare verdediging zal plaatsvinden op

woensdag 14 oktober om 12:45 uur

door

Dirk Struik

geboren op 15 mei 1984
te Delfzijl

Promotores

Prof. dr. J.W. Jonker
Prof. dr. H.J. Verkade

Copromotor

dr. J.K. Kruit

Beoordelingscommissie

Prof. dr. A.J.A. van de Sluis
Prof. dr. M.A.T.M. van Vugt
Prof. dr. E. Kalkhoven

Paranimfen

Niels L. Mulder

Roos E. Eilers

Qui, sul bordo di quel che sappiamo, a contatto con l'oceano di quanto non sappiamo, brillano il mistero del mondo, la bellezza del mondo, e ci lasciano senza fiato – Carlo Rovelli, Sette Brevi Lezioni di Fisica (Here, on the edge of what we know, in contact with the ocean of the unknown, shines the mystery and beauty of the world. And it's breathtaking – Carlo Rovelli, Seven Brief Lessons on Physics)

Contents

Chapter 1: Introduction.....	7
Chapter 2: Fibroblast Growth Factors in control of lipid metabolism: from biological function to clinical application	39
Chapter 3: Pegbelfermin (BMS-986036): an investigational PEGylated Fibroblast Growth Factor 21 Analogue for the treatment of Non-Alcoholic Steatohepatitis (NASH)	57
Chapter 4: Effective treatment of steatosis and steatohepatitis by fibroblast growth factor 1 in mouse models of non-alcoholic fatty liver disease	75
Chapter 5: Discovery-based proteomics identifies ApoB as a target of recombinant fibroblast growth factor 1	99
Chapter 6: Fibroblast growth factor 1 normalizes glucose metabolism in <i>ob/ob</i> mice by enhancing beta-adrenergic activity.....	117
Chapter 7: FGF1 stimulates acute and chronic glucose uptake via MEK1/2-dependent regulation of GLUT1 and GLUT4 in 3T3-L1 adipocytes.....	139
Chapter 8: A single mutation in the heparin-binding site of fibroblast growth factor 1 leads to uncoupling of DNA synthesis and mitosis.....	157
Chapter 9: Validation of peptide-based tyrosine kinase and phosphatase activity micro-arrays to study fibroblast growth factor 1 signaling	175
Chapter 10: Profiling of the fibroblast growth factor system in post-mortem hypothalamus tissue of lean and obese humans	193
Chapter 11: Discussion	211
Summary	235
Samenvatting	239
Dankwoord	245
Curriculum vitae	251
Publications	253
