The versatile activity of glycogen branching enzymes

PhD thesis

to obtain the degree of PhD at the
University of Groningen
on the authority of the
Rector Magnificus Prof. C. Wijmenga
and in accordance with
the decision by the College of Deans.

This thesis will be defended in public on

Friday 16 October 2020 at 12.45 p.m

by

Aline Lucie Odette Gaenssle

born on 20 April 1990
in Vienna, Austria

Supervisor

Prof. M.J.E.C. van der Maarel

Co-supervisors

Dr. E. Jurak

Dr. R.J. Leemhuis

Assessment committee

Prof. C. D'Hulst

Prof. M.W. Fraaije

Prof. H.A. Schols

Table of contents

Chapter 1	General introduction.....	7
Chapter 2	Reliability factor for identification of low activity of amylolytic enzymes in the starch-iodine assay.....	45
Chapter 3	The degree of branching of amylopectin is positively correlated to gelatinized starch digestibility.....	65
Chapter 4	The structure of the final product of glycogen branching enzymes will be achieved irrespective of the substrate structure.....	85
Chapter 5	GH13 Glycogen branching enzymes can adapt the substrate chain length towards their preferences via α -1,4-transglycosylation.....	107
Chapter 6	Summary, discussion and conclusion.....	127
	Samenvatting.....	143
	Acknowledgments.....	147
	Curriculum vitae.....	151
