Lifestyle, Inflammation
& Vascular Calcification
in Kidney Transplant Recipients:
Perspectives on Long-Term Outcomes

Camilo G. Sotomayor

Sotomayor CG

Lifestyle, Inflammation, and Vascular Calcification in Kidney Transplant Recipients: Perspectives on Long-Term Outcomes.

PhD Dissertation, University of Groningen, Groningen, The Netherlands.

This dissertation includes a summary in Dutch and a summary in Spanish.

The doctorate studies presented in this thesis were performed within the framework of *Becas de Doctorado en el extranjero, Becas Chile*, financially supported by *Agencia Nacional de Investigación y Desarrollo* (research grant F 72190118). The studies presented in this thesis were based on data of the TransplantLines Insulin Resistance and Inflammation cohort, which was funded by the Dutch Kidney Foundation (grant C00.1877), and data of the TransplantLines Food and Nutrition Biobank and Cohort Study, which was funded by the Top Institute Food and Nutrition (A-1003).

Financial support for the printing of this thesis from the University of Groningen, University Medical Center Groningen, Dutch Kidney Foundation, and Dutch Heart Foundation is gratefully acknowledged.

umcg

Additional financial support for the printing of this thesis was kindly provided by Laboratorio Clínico Tecnoanálisis, Valtek SA, ERBE Nederland BV, Chipsoft BV, Bio-Connect Diagnostics BV, Noord Negentig accountants en belastingadviseurs, and Chiesi Pharmaceuticals, among others, as shown below.

Lifestyle, Inflammation, and Vascular Calcification in Kidney Transplant Recipients: Perspectives on Long-Term Outcomes

PhD thesis

to obtain the degree of PhD at the
University of Groningen
on the authority of the
Rector Magnificus Prof. C. Wijmenga
and in accordance with
the decision by the College of Deans.

This thesis will be defended in public on

Wednesday 28 October 2020 at 11.00 hours

by

Camilo Germán Sotomayor Campos

born on 18 January 1993
in Linares, Chile

TABLE OF CONTENTS

Chapter 1	Introduction and Aims of this Thesis Lifestyle, Inflammation, and Vascular Calcification in Kidney Transplant Recipients: Perspectives on Long-Term Outcomes <i>J Clin Med</i> 2020, 9, 1911	15
Part I	Lifestyle; Healthy Diet & Toxic Contaminants	49
Chapter 2	Consumption of Fruits and Vegetables and Cardiovascular Mortality in Renal Transplant Recipients: A Prospective Cohort Study <i>Nephrol Dial Transplant</i> 2020, 35, 357–365	51
Chapter 3	Fish Intake, Circulating Mercury and Mortality in Renal Transplant Recipients <i>Nutrients</i> 2018, 10, 1419	89
Chapter 4	Plasma Cadmium is Associated with Increased Risk of Long-Term Kidney Graft Failure <i>Kidney Int</i> - Accepted	121
Part II	Inflammation and Oxidative Stress & Vascular Calcification	177
Chapter 5	Vitamin C Depletion and All-Cause Mortality in Renal Transplant Recipients <i>Nutrients</i> 2017, 9, 568	179
Chapter 6	Circulating Advanced Glycation Endproducts and Long-Term Risk of Cardiovascular Mortality in Kidney Transplant Recipients <i>Clin J Am Soc Nephrol</i> 2019, 14, 1512–1520	201

Chapter 7	Galectin-3 and Risk of Late Graft Failure in Kidney Transplant Recipients: A 10-years Prospective Cohort Study <i>Transplantation</i> - Accepted	235
Chapter 8	Bone Mineral Density and Aortic Calcification: Evidence for a Bone-Vascular Axis after Kidney Transplantation <i>Transplantation</i> - Accepted	265
Chapter 9	Lifestyle, Inflammation, and Vascular Calcification in Kidney Transplant Recipients: Perspectives on Long-Term Outcomes	289
	› Summary	291
	› Discussion and Future Perspectives	302
Appendix	Dutch Summary	325
	Spanish Summary	331
