Context Matters: Memories of Prior Times

PhD thesis

to obtain the degree of PhD at the
University of Groningen
on the authority of the
Rector Magnificus Prof. C. Wijmenga
and in accordance with
the decision by the College of Deans.

This thesis will be defended in public on
Thursday 29 October 2020 at 18.00 hours

by

Sarah C. Maaß

born on 1 July 1991
in Sèvres, Paris, France

Supervisor

Prof. dr. D. H. van Rijn

Prof. dr. T. Wolbers

Co-supervisor

Dr. L. van Maanen

Assessment Committee

Prof. dr. D. Bueti

Prof. dr. N. Busch

Prof. dr. N.A. Taatgen

Funding

This project is part of the research program "Interval Timing in the Real World: A functional, computational and neuroscience approach" (project number 453-16-005) financed by the Netherlands Organization for Scientific Research awarded to prof. dr. D. H. van Rijn.

“Nothing is ours, except time.”

-Seneca

If *time* is ours, where do we keep it?

Do we keep *time* forever or can we lose it?

Does *time* we've experienced, influence how we perceive it?

If our memory fades does *time* fade too?

Or in scientific terms:

How do prior experiences shape the perception of time?

How do memory deficiencies affect interval timing?

Content

Chapter 1	1
General Introduction: Context of Time	
Chapter 2	15
The Context Matters	
Chapter 3	35
Taking Memory out of Timing	
Chapter 4	55
Timing when Memory is Lost	
Chapter 5	77
Timing with Aging Memory	
Chapter 6	89
The Cognitive Computational Modeling Perspective	
Chapter 7	117
General Discussion: Time in Context	
Summary/Samenvatting	129
References	141
Acknowledgements	152
