Table of content

Chapter 1	General introduction	7
Chapter 2	The pathophysiology of asthma remission	29
Chapter 3	Childhood factors associated with complete and clinical asthma remission at 25 and 49 years	77
Chapter 4	Assessing small airways dysfunction in asthma, asthma remission, and healthy controls using Particles in Exhaled Air (PExA)	91
Chapter 5	Small airways disease and airway inflammation in asthma remission	101
Chapter 6	Applying the CAMP trial asthma remission prediction model to the Dutch asthma remission studies	111
Chapter 7	The asthma-obesity relationship: underlying mechanisms and treatment implications	117
Chapter 8	A cellular census of human lungs identifies novel cell states in health and in asthma	137
Chapter 9	Optical coherence tomography intensity correlates with extracellular matrix components in the airway wall	175
Chapter 10	Serum periostin does not reflect type 2-driven inflammation in COPD	185
Chapter 11	Bronchial gene expression clustering in COPD identifies a subgroup with higher level of bronchial T-cells and accelerated lung function decline	199
Chapter 12	Summary	225
Chapter 13	Discussion and future perspectives	233
Chapter 14	Nederlandse samenvatting	255
	Curriculum Vitae	269
	Dankwoord	270
