The research presented in this thesis was supported by a grant from ZonMw – the Netherlands Organization for Health Research and Development (grant nr. 729300105) and was approved by the ethics committee of the Heymans Institute for Psychological Research of the University of Groningen in the Netherlands (code: 16025-O)

The content of this thesis is partly based on data gathered as part of a study on comparing the validity of the Dutch SDQ and the KIVPA for screening in Dutch child and adolescent social care (ZonMw grant nr. 15700.1021) and the TAKECARE cohort study on tracing achievements, key processes and efforts in professional care for children and adolescents (ZonMw grant nr. 15900.0001)
