The role of small conductance calcium-activated potassium channels in mitochondrial dysfunction

Targeting metabolic reprogramming and calcium
homeostasis

Proefschrift

ter verkrijging van de graad van doctor aan de
Rijksuniversiteit Groningen
op gezag van de
rector magnificus prof. dr. C. Wijmenga
en volgens besluit van het College voor Promoties.

De openbare verdediging zal plaatsvinden op
vrijdag 27 november 2020 om 16.15 uur

door

Inge Eline Krabbendam

geboren op 24 maart 1992
te Utrecht

Promotores

Prof. dr. A.M. Dolga

Prof. dr. M. Schmidt

Beoordelingscommissie

Prof. dr. G. Bultynck

Prof. dr. O.C.M. Sibon

Prof. dr. A. Kortholt

Table of content

Chapter 1 - General introduction	7
Chapter 2 - Mitochondrial Ca ²⁺ -activated K ⁺ channels and their role in cell life and death pathways <i>Cell Calcium, 69, 101-111 (2018)</i>	29
Chapter 3 - SK channel activation is neuroprotective in conditions of enhanced ER-mitochondrial coupling <i>Cell Death & Disease, 9, 593 (2018)</i>	59
Chapter 4 - Inhibition of mitochondrial calcium uptake protects against erastin-induced ferroptosis <i>Manuscript in preparation</i>	83
Chapter 5 - SK channel-mediated metabolic escape to glycolysis inhibits ferroptosis and supports stress resistance in <i>C. elegans</i> <i>Cell Death & Disease, 11, 263 (2020)</i>	113
Chapter 6 - Activation of SK channels regulates inflammatory processes in macrophages <i>Manuscript in preparation</i>	159
Chapter 7 - SK channel activation potentiates auranofin-induced cell death in glio- and neuroblastoma cells <i>Biochemical Pharmacology, 123, 105748 (2020)</i>	183
Chapter 8 - General discussion and main conclusions	213
Appendix	233
