Snap Shots of Bacterial Adaptation

Bimal Prajapati

The research described in this thesis was conducted at the Molecular Bacteriology lab at the Department of Medical Microbiology of the University Medical Center Groningen and the University of Groningen, the Netherlands.

This research was funded by the Graduate School of Medical Sciences and the Ubbo Emmius Fund.

Printing of this thesis was financially supported by the Graduate School of Medical Sciences of the University of Groningen and Groningen University Library.

Snap Shots of Bacterial Adaptation

Dissertation of the University of Groningen

ISBN: 978-94-6421-128-3

Cover photo: Voronoi treemaps comparing the transcriptome of the *B. subtilis* *tat*-mutant bacteria to the wild-type strain 168 during the lysis phase and recovery phase when grown in Lysogeny Broth without NaCl.

Snap Shots of Bacterial Adaptation

PhD thesis

to obtain the degree of PhD at the
University of Groningen
on the authority of the
Rector Magnificus Prof. C. Wijmenga
and in accordance with
the decision by the College of Deans.

This thesis will be defended in public on

Wednesday 25 November 2020 at 12:45 hours

by

Bimal Prajapati

born on 24 September 1988
in Kathmandu, Nepal

Supervisors

Prof. J.M. van Dijk
Prof. A.W. Friedrich

Assessment Committee

Prof. C.R. Harwood
Prof. H.J. Busscher
Prof. J. Kok

Table of Contents

Chapter 1	Introduction and scope of the thesis	9
Chapter 2	Double trouble: <i>Bacillus</i> depends on a functional Tat machinery to avoid severe oxidative stress and starvation upon entry into a NaCl-depleted environment	35
Chapter 3	Conditional essentiality of the small RNA S313 for expression of the elemental iron transport system <i>efeUOB</i> in <i>Bacillus subtilis</i> and resistance to cefuroxime	77
Chapter 4	In the Cave of Wonders – $^{14}\text{N}/^{15}\text{N}$ metabolic labelling provides new insights in cell physiology during twin-arginine translocation in <i>Bacillus subtilis</i>	121
Chapter 5	Induction of phages differentiates the adaptative response to subinhibitory ciprofloxacin exposure in clinical <i>S. aureus</i> USA300 isolates	171
Chapter 6	Summary, Conclusion and Future Perspectives	199
Appendix	Nederlandse Samenvatting	215
	Acknowledgements	225
	Biography	231
