Influences of Complex Topography and Biochemistry on Mesenchymal Stem Cell Differentiation

PhD thesis

to obtain the degree of PhD at the
University of Groningen
on the authority of the
Rector Magnificus Prof. C. Wijmenga
and in accordance with
the decision by the College of Deans.

This thesis will be defended in public on

Monday 7 December 2020, at 11.00 hours

by

Liangliang Yang

born on 29 June 1988
in Hebei, China

Promotor

Dr. P. van Rijn

Co-Promotor

Dr. T.G. van Kooten

Assessment Committee

Prof. R.A. Bank

Prof. P.R. Onck

Prof. S.C.G. van Leeuwenburgh

To my dearest family

Paranymphs:

Torben A. B. van der Boon

Valentina Vignali

Table of Contents

Chapter 1	General Introduction and Aim of this Thesis	1
	1.1 Cells and their microenvironment	2
	1.2 Cell sense the materials	3
	1.3 Cells interact with biomaterials	3
	1.4 Osteogenesis and neurogenesis of stem cells in clinical applications	4
	1.5 Aim of this thesis	4
	1.6 Outline of this thesis	5
	1.7 References	6
Chapter 2	High-throughput Methods in the Discovery and Study of Biomaterials and Materiobiology	11
	2.1 Introduction	12
	2.2 Physicochemical influences on macroscopic cell behaviors	12
	2.3 Physicochemical influences on stem cell differentiation	18
	2.4 Limitations of gradient based high-throughput systems	23
	2.5 References	24
Chapter 3	Topography induced stiffness alteration of stem cells influences osteogenic differentiation	31
	3.1 Introduction	33
	3.2 Methods	34
	3.3 Results	36
	3.4 Discussion	45
	3.5 Conclusions	47
	3.6 References	48
Chapter 4	Decoupling amplitude and wavelength of anisotropic topography and the influence on osteogenic differentiation of stem cells using a high-throughput screening approach	51
	4.1 Introduction	53
	4.2 Methods	54
	4.3 Results and Discussion	55
	4.4 Conclusion	61
	4.5 References	63
Chapter 5	High-throughput screening and hierarchical topography-mediated neural differentiation of mesenchymal stem cells	67
	5.1 Introduction	69
	5.2 Methods	70
	5.3 Results	72
	5.4 Discussion	82
	5.5 Conclusion	84
	5.6 References	85
Chapter 6	Biomimetic multiscale hierarchical topography enhances osteogenic differentiation of human mesenchymal stem cells	87
	6.1 Introduction	89
	6.2 Methods	90
	6.3 Results	92
	6.4 Discussion	100
	6.5 Conclusion	102
	6.6 References	103

Chapter 7	Synergistic effect of cell-derived extracellular matrix and topography on osteogenesis of mesenchymal stem cells	107
	7.1 Introduction	109
	7.2 Methods	110
	7.3 Results	112
	7.4 Discussion	122
	7.5 Conclusion	123
	7.6 References	125
Chapter 8	General Discussion & Future Perspective	129
	8.1 Discussion & Future plans	130
	8.2 References	133
	Summary	135
	Samenvatting	139
	Publications	143
	Acknowledgements	145
