Heart failure biomarkers: The importance of cardiac specificity

Proefschrift

ter verkrijging van de graad van doctor aan de
Rijksuniversiteit Groningen
op gezag van de
rector magnificus prof. dr. C. Wijmenga
en volgens besluit van het College voor Promoties.

De openbare verdediging zal plaatsvinden op

woensdag 9 december 2020 om 16.15 uur

door

Arnold Piek

geboren op 3 mei 1993
te Groningen

Promotores

Prof. dr. H.H.W. Sillje

Prof. dr. R.A. de Boer

Beoordelingscommissie

Prof. dr. A.J.A. van de Sluis

Prof. dr. A.A. Voors

Prof. dr. C.E. Mueller

TABLE OF CONTENTS

Chapter 1	Introduction	7
Chapter 2	The fibrosis-cell death axis in heart failure <i>Heart Fail Rev. 2016 Mar;21(2):199-211</i>	17
Chapter 3	HE4 serum levels are associated with heart failure severity in patients with chronic heart failure <i>J Card Fail. 2017 Jan;23(1):12-19</i>	39
Chapter 4	Novel heart failure biomarkers: Why do we fail to exploit their potential? <i>Crit Rev Clin Lab Sci. 2018 Jun;55(4):246-263</i>	55
Chapter 5	Plasma levels of heart failure biomarkers are primarily a reflection of extracardiac production <i>Theranostics. 2018 Jul;8(15):4155-4169</i>	85
Chapter 6	A combined bioinformatics, experimental and clinical approach to identify novel cardiac specific heart failure biomarkers: Is Dickkopf-3 (DKK3) a possible candidate? <i>Eur J Heart Fail. 2020 Aug. doi 10.1002/ejhf.1988</i>	121
Chapter 7	The emerging plasma biomarker Dickkopf-3 (DKK3) and its association with renal and cardiovascular disease in the general population <i>Manuscript in submission</i>	159
Chapter 8	Pharmacological myeloperoxidase (MPO) inhibition in an obese/hypertensive mouse model attenuates obesity and liver damage, but not cardiac remodeling <i>Sci Rep. 2019 Dec;9(1):18765</i>	175
Chapter 9	Summary, discussion and future perspectives	201
Appendices		219
	Dutch summary	221
	Curriculum vitae	237
	Acknowledgements	239
