Comprehending the development of reading difficulties in children with DLD

PhD thesis

to obtain the degree of PhD at the
University of Groningen
on the authority of the
Rector Magnificus Prof. C. Wijmenga
and in accordance with
the decision by the College of Deans.

This thesis will be defended in public on
Thursday 10 December 2020 at 12.45 hours

by

Camila Martínez Rebolledo

born on 14 January 1988
in Santiago de Chile, Chile

Supervisors

Prof. B.A.M. Maassen
Prof. N.M. Maurits

Assessment Committee

Prof. P. Hendriks
Prof. J.E. Rispen
Prof. J.C.J. Hoeks

Acknowledgements

It's been more than 6 years of this challenging and beautiful adventure, and needless to say, even more challenging (for everyone) during the last period. During this long adventure, built from many mini-adventures, the learning and growing have been immeasurable. So, the time has come to thank everyone for their grain of sand, that made it possible for me to reach this point.

First of all, I deeply appreciate Professor Petra Hendriks, Professor Judith Rispens and Professor John Hoeks, from the assessment committee, who not only took the time to read this dissertation, but also gave important and assertive comments to improve it and take it to what it is now. I also thank Professor Martijn Wieling, for his feedback.

To arrive in Groningen, I needed the support and mentoring of many people. I will always be grateful to Professor Patricio Peirano and the Sleep Lab, for all you gave me and the affection during many years of work. I also thank Professor Cecilia Vergara, for all her help during tough times, thanks for the advices and company.

An especial paragraph goes to my supervisors, Professor Ben Maassen and Professor Natasha Maurits, who gave me their trust before this project, and gave me the chance to be here. I started working with them a year before starting this project, and I really thank them for their support during the application and development of this research. I render especial thanks to them for their support during the writing process, definitely the toughest for me.

To write this dissertation, I got the fundamental support of those helping me getting the participants and giving me access to the participants and their parents. I thank the Municipal Corporation of San Bernardo, and the schools Jaime Guzmán and Valle de Lluta, I thank them for their patience and trust. I particularly thank their principals and the people from the integration programmes. Acknowledgements go to the 'Bellavista de la Florida' that made my work possible and accompanied me in the process. Finally, thanks to the Language school 'Con Agua de Cielo', for helping me in times of scarce participants, many thanks Nicole.

I will also take the space to thank CedetiUC, Professor Ricardo Rosas, Victoria Espinoza and Pablo Escobar, for not only letting me work with GraphoGame, but also work with me in improving and implementing it, for its use in Latin America. Thank you Jesper for trusting that this was a good idea. I am also grateful to Ulla Richardson, and the University of Jyväskylä, for their beautiful work on helping children in their process of learning to read.

To be able to travel and work without big problems, I had the support of many people at RUG, answering even the silliest questions. Thanks Diana, Christina, Ghorus and Alice.

Regarding my academic development, I must acknowledge those who received me when I came back to Chile. Thanks to the Institute for the Sciences of Education at the University of O'Higgins, for their patience and help in this stage, that took longer than initially expected. Especial acknowledgement to the directors, Gabriela Gómez and David Gómez. I will always be thankful not only for the opportunity, but for giving me the opportunity to meet Cami P, who was an extremely important support during this time.

During my time in Groningen, a city I really appreciate for its liveliness and 'gezelligheid', there were many people that made my stay possible. Their presence was needed, mostly to survive the long periods without my family. I first thank those I shared working spaces, lunches and some 'borrels' with. Thank you Jidde, Juliana, Aida, Jakolien, Pouran, Frank, Nate, Assunta, Katya, Yulia, Svetlana, Teja and Sahna.

To those who became my friends, Annie, Srdjan and Toivo. Thank you, Annie, for the long and funny talks and procrastination opportunities, I will always be thankful for the chance I had to get to know you and share office and experiences with you. Many thanks to Srdjan, for the coffees, conversations and company, you really made it easier in tired and stressed times. Finally, thank you Toivo for always be open to answer my questions (often more than once), for rescuing me in times of work-related crisis, giving me not only the academic answers, but also the emotional support I needed.

During my time in Groningen, I also made a Chilean family, outside of Chile. With whom I shared stories and experiences that lightened the cultural shock. Thank you, Moni, Rodrigo, Tami, Juan, Felipe, Mariella (the not-so-Chilean-friend), Esteban, Cristina, Erik, Eli, Martín, Feña and Maxi (our adopted nephew). We travelled, celebrated and accompanied each other.

Here, I will also thank Claudia, who showed me the music world again. I thank you for your support and company. I am thankful as well, for getting to know my friends from Biology. I got to know them because of Reinaldo, but I got to consider them to be my friends: Xiaoyan, Q, Sara, Michela and Martje.

Although already mentioned as friends, I thank Annie and Eli for being my paranympths and helping me with this last period, and all that's needed for a defence during corona times.

It might be surprising for some readers, but I don't live this life alone. I have a very big family, always with me. I kept on-line contact with them, often excessively, that allowed me to survive these 5 years in Groningen. I hug them all, my uncles, aunts and cousins that are always there with kind words and care. I am sorry that I don't mention each of you, but it's quite a long list. I will give my special greetings to my nephews and nieces, that arrived to light-up our days. Particularly, to my melliz, who made their contribution to this dissertation's cover. I include in this paragraph my life companions, thank you Anita, Poli, Bruno, Danny, Beli and Vale. Special thanks to Cami C, for always being by my side, and helping me with the design of this book.

In addition to this large family, given and chosen, there is of course my nuclear family: I am beyond grateful for taking even the smallest opportunity to visit us and give me all the hugs pending during the times apart. Thanks to my parents, who showed me the academic world, and have supported and accompanied me in every decision I made, no matter how difficult it was for them (as being 5 years apart). To my daddy, Francisco, loving, sympathetic, dreamer, and without limits to his solidarity; to my mommy, Sofía, partner, a woman in a world of men, winner of thousand battles and the support of all those she loves. My parents are accompanied by my little siblings, who I deeply adore and admire. Nico, the joy of

living and endless energy to keep going and make this a better world; Iru, always available to fight the injustice, who lives extremely fast, to change everything that is humanly possible. My grandfathers, with their thousand stories, they so generously share and are always there for us. And, my grandmothers: Myrna, who left us some years ago, but gave us all the energy of a progressive woman in a conservative world, thanks for the freedom. Tita, who gives her life for her loved ones, my second mom, thank you for always being with me, and thanks the world for your always changing mind.

Finally, I want to thank my partner, Reinaldo. I came to Groningen with him in 2013, a gamble that came out better than expected. I love you, I admire you and I walk with you. Let's go for more adventures, they have been quite successful so far.

The world is changing, Chile is changing, I hope we all change in time for a better future.

Table of Contents

Acknowledgements	6
Chapter 1 General Introduction	
1.1 Introduction	17
1.2 Developmental Language Disorder (DLD)	20
1.2.1 DLD in Chile	22
1.3 DLD and RD: strongly related, not the same	23
1.3.1 Neural correlates of a phonological impairment	25
1.3.2 Neural correlates of a phonological impairment	27
1.4 GraphoGame, training reading skills through serious gaming	29
1.5 This Dissertation	30
Chapter 2 Early comprehension skills impact later reading development: higher risk of later reading difficulties in children diagnosed with DLD with expressive as well as receptive problems	
Abstract	36
2.1 Introduction	37
2.2 Methods	41
2.2.1 Participants	41
2.2.2 Procedure	42
2.2.3 Materials	43
2.2.3.1 First assessment - Language tests	43
2.2.3.1.1 Oral comprehension	43
2.2.3.1.2 RAN	43
2.2.3.2 First assessment - GraphoGame in-game assessment	45
2.2.3.3 Follow-up assessment – Language tests	46
2.2.3.3.1 Oral comprehension	46
2.2.3.3.2 RAN	46
2.2.3.3.3 Reading fluency	47
2.2.4 Statistical analyses	47
2.2.4.1 Group characteristics and comparison - first assessment	47
2.2.4.2 Follow-up assessment	48
2.3 Results	48
2.4 Discussion	54

Chapter 3	Mismatch response in children with DLD and their risk of developing reading difficulties	
	Abstract	62
3.1	Introduction	63
3.2	Methods	68
3.2.1	Participants	68
3.2.2	Procedure	69
3.2.3	Materials	69
3.2.3.1	Intervention	69
3.2.3.2	GraphoGame Assessment	69
3.2.3.3	Behavioural assessment: comprehension	70
3.2.3.4	ERP Stimuli and experimental design	70
3.2.3.5	EEG recording	71
3.2.3.6	Follow up assessment: reading fluency	71
3.2.4	Data analyses	71
3.3	Results	75
3.4	Discussion	86
3.4.1	Development of MMR in children with DLD as compared to TD	86
3.4.2	Phonological awareness and MMR	89
3.4.3	Relation between oral comprehension skills and MMR	90
3.4.4	Comparison of the effect of behavioural measures on MMN and LDN	91
	Appendix	93
Chapter 4	Print tuning development in children with DLD, and their risk of developing reading difficulties	
	Abstract	100
4.1	Introduction	101
4.2	Methods	105
4.2.1	Participants	105
4.2.2	Procedure	106
4.2.3	Materials	106
4.2.3.1	Intervention	106
4.2.3.2	GraphoGame Assessment	106

Chapter 4 Print tuning development in children with DLD, and their risk of developing reading difficulties

4.2.3.3	Baseline and follow-up assessment: comprehension	107
4.2.3.4	Stimuli and experimental design	107
4.2.3.5	EEG recording	108
4.2.3.6	Follow up assessment: reading fluency	109
4.2.4	Data analyses	109
4.3	Results	112
4.4	Discussion	119
4.4.1	Development of print tuning in children with DLD	120
4.4.2	Relationship between oral comprehension skills and print tuning	121
4.4.3	Best model predicting PT in children with DLD and typical development: Relationship between word reading fluency in second grade and print tuning in kindergarten and first grade	122
	Appendix	125

Chapter 5 GraphoGame intervention as a tool for early diagnosis of reading difficulties in children with developmental language disorder

	Abstract	132
5.1	Introduction	133
5.2	Methods	137
5.2.1	Participants	137
5.2.2	Procedure	138
5.2.3	Materials	139
5.2.3.1	First assessment - GraphoGame in-game assessment	139
5.2.3.2	Follow-up assessment - Reading fluency	139
5.2.4	Statistical analyses	140
5.2.4.1	Group characteristics and comparison – assessing progress after GG intervention	140
5.2.4.2	Performance within the GG intervention	141
5.3	Results	142
5.3.1	Progress after GG intervention	142
5.3.2	Correlation between performance in GG and later reading fluency	152
5.4	Discussion	153

Chapter 6	General Discussion	
6.1	Introduction	165
6.2	DLD: the effect of comprehension difficulties on reading abilities and brain response	166
6.3	Risk factors for the development of reading difficulties	168
6.4	DLD and reading difficulties	170
6.5	GraphoGame for Chilean Spanish: towards a diagnosis through training	171
6.6	Limitations and their impact on our studies	173
6.7	General Conclusions	173
Appendix	Developmental Language Disorders: Diagnostic criteria and available tests in the Chilean educational system	178
