CONTENTS

Chapter 1	General introduction	9
Chapter 2	A review of bispecific antibodies and antibody constructs in oncology and clinical challenges <i>Pharmacol Ther. 2019;201:103-19</i>	15
Chapter 3	Biodistribution of a CD3/EpCAM bispecific T-cell engager is driven by the CD3 arm <i>J Nucl Med. 2020;61:1594-601</i>	61
Chapter 4	Mesothelin/CD3 half-life extended bispecific T-cell engager molecule shows specific tumor uptake and distributes to mesothelin and CD3 expressing tissues <i>Submitted</i>	87
Chapter 5	⁸⁹ Zr-labeled Bispecific T-cell Engager AMG 211 PET shows AMG 211 accumulation in CD3-rich tissues and clear, heterogeneous tumor uptake <i>Clin Cancer Res. 2019;25:3517-27</i>	111
Chapter 6	Development and evaluation of interleukin-2 derived radiotracers for PET imaging of T-cells in mice <i>J Nucl Med. 2020;61:1355-466</i>	135
Chapter 7	Radiolabeled monoclonal antibody against colony-stimulating factor 1 receptor specifically distributes to spleen and liver in immunocompetent mice <i>Submitted</i>	155
Chapter 8	Fluorescent image-guided surgery in breast cancer by intravenous application of a quenched fluorescence probe for cysteine cathepsins in a syngeneic mouse model <i>EJNMMI Res. 2020;10:111</i>	173
Chapter 9	Summary and future perspectives	191
Chapter 10	Nederlandse samenvatting (summary in Dutch)	201
Appendix	Dankwoord (acknowledgements)	207
