Innate Immune Memory and Transcriptional Profiling of Microglia

Yang Heng

The research presented in this thesis was conducted at the Section Molecular Neurobiology, Department Biomedical Sciences of Cells & Systems, University Medical Center Groningen, University of Groningen, The Netherlands.

The research in this thesis was financially supported by the China Scholarship Council and University Medical Center Groningen.

Printing	Ridderprint
Cover design	Yang Heng
On the Cover	On the front cover, the two clouds represent the immune training response of microglia. After the first challenge, microglia show enhanced response to a sequential challenge. The transition of Yin-Yang represents the phenotypical change of microglia. The six microglia in Yin-Yang represent microglia phenotypic diversity. The transition of cold-warm color in the background is also inspired by Yin-Yang theory. On the back cover, the two clouds represent the immune tolerance response of microglia. The windmill at the bottom left corner is inspired by the Windmill 'De Helper' in Paterswoldsemeer, Groningen.
Financial support	University of Groningen University Medical Center Groningen Research School of Behavioral and Cognitive Neurosciences

Innate Immune Memory and Transcriptional Profiling of Microglia

PhD thesis

to obtain the degree of PhD at the
University of Groningen
on the authority of the
Rector Magnificus Prof. C. Wijmenga
and in accordance with
the decision by the College of Deans.

This thesis will be defended in public on

Wednesday 10 February 2021 at 14:30 hours

by

Yang Heng

born on 9 September 1990
in Hebei, China

Supervisors

Prof. B.J.L. Eggen

Prof. J.D. Laman

Co-supervisor

Dr. S.M. Kooistra

Assessment committee

Prof. H.E. de Vries

Prof. L.A.B. Joosten

Prof. J.W. Jonker

Chairi Misrielal

Contents

Chapter 1

General introduction and outline of the thesis	9
--	---

Chapter 2

Mouse models of central nervous system ageing	45
---	----

Chapter 3

Intrinsic DNA damage repair deficiency results in progressive microglia loss and replacement	73
--	----

Chapter 4

Systemic administration of β -glucan induces immune training in microglia	113
---	-----

Chapter 5

Microglia nuclear RNA profiles are a reliable proxy for microglia cellular transcriptomes	147
---	-----

Chapter 6

The effects of postmortem delay on mouse and human microglia gene expression	171
--	-----

Chapter 7

Summary and general discussion	189
--------------------------------	-----

Chapter 8

Nederlandse samenvatting	214
