Identification and characterization of flavoprotein monooxygenases for biocatalysis

Alejandro Alberto Gran Scheuch

The research described in this thesis was performed at:

- Molecular Enzymology Group, Groningen Biomolecular Sciences and Biotechnology Institute (GBB), University of the Groningen, The Netherlands.
- Department of Chemical and Bioprocesses Engineering, School of Engineering, Pontificia Universidad Católica de Chile, Santiago, Chile.

The research conducted in this thesis was financially supported by:

This work was supported by the Institute for Biological and Medical Engineering from Pontificia Universidad Católica de Chile and CORFO's grant 14ENI2-26862. A Ph.D. scholarship from ANID (Agencia Nacional de Investigacion y Desarrollo, ex-CONICYT; scholarship 21151392), from VRI of Pontificia Universidad Católica de Chile, from the Faculty of engineering of Pontificia Universidad Católica de Chile and from the University of Groningen are acknowledged.

Printing of this thesis was financially supported by:

University of Groningen

Identification and characterization of flavoprotein monooxygenases for biocatalysis

PhD thesis

to obtain the degree of PhD at the
University of Groningen
on the authority of the
Rector Magnificus Prof. C. Wijmenga
and in accordance with
the decision by the College of Deans
and

to obtain the degree of PhD at the
Pontificia Universidad Católica de Chile
on the authority of the
Rector Prof. I. Sánchez Díaz
and in accordance with
the decision by the the Office of Graduate Studies

Double PhD degree

This thesis will be defended in public on

Friday 8 January 2021 at 14.30 hours

by

Alejandro Alberto Gran Scheuch

born on 26 December 1989

in Las Condes, Chile

Supervisors:

Prof. Dr. M.W. Fraaije

Prof. Dr. D.B. Janssen

Co-supervisor:

Dr. L. Parra

Assessment Committee:

Prof. Dr. J.A. Asenjo

Prof. Dr. M. Vásquez

Prof. Dr. W.J.H. van Berkel

Prof. Dr. A.J.M. Driessen

TABLE OF CONTENTS

Chapter I	Baeyer-Villiger monooxygenases, tunable oxidative biocatalysts	7
Chapter II	Optimizing the linker length for fusing an alcohol dehydrogenase with a cyclohexanone monooxygenase	57
Chapter III	Systematic assessment of uncoupling in flavoprotein oxidases and monooxygenases	89
Chapter IV	Genome mining of oxidation modules in trans-acyltransferase polyketide synthases reveals a culturable source for lobatamides	123
Chapter V	Identification of two flavin-containing monooxygenases from <i>Chloroflexi</i> and <i>Hypsibius dujardini</i>	161
Chapter VI	Mining the genome of <i>Streptomyces leeuwenhoekii</i> : Two new type I Baeyer-Villiger monooxygenases from Atacama Desert	187
Chapter VII	Summary and conclusions	223
Appendices	Nederlandse samenvatting	231
	Resumen en español	237
	List of publications	242
	Acknowledgments / Agradecimientos	243
