Contributions to the study of the complement system in IgA nephropathy and dialysis

PhD thesis

to obtain the degree of PhD at the
University of Groningen
on the authority of the
Rector Magnificus Prof. C. Wijmenga
and in accordance with
the decision by the College of Deans.

This thesis will be defended in public on

Wednesday 20 January 2021 at 12.45 hours

by

António Bernardo Albuquerque Pereira Oliveira De Faria

born on 5 February 1981
in Porto, Portugal

Supervisors

Prof. S.P. Berger
Prof. M.J. Pestana

Co-supervisors

Dr. M.A.J. Seelen
Dr. F. Poppelaars

Assessment Committee

Prof. J.L. Hillebrands
Prof. C. van Kooten
Prof. M. Vervloet

TABLE OF CONTENTS

Chapter 1	General Introduction	8
PART A – The Complement System in IgA Nephropathy		
Chapter 2	Combined C4d and CD3 predicts IgA Nephropathy progression <i>Clinical and Experimental Immunology, 2015</i>	22
Chapter 3	Arteriolar C4d in IgA Nephropathy: a cohort study <i>American Journal of Kidney Diseases, 2020</i>	40
PART B – The Complement System in Dialysis		
Chapter 4	The complement system in dialysis: a forgotten story? <i>Frontiers in Immunology, 2018</i>	66
Chapter 5	Intradialytic complement activation precedes the development of cardiovascular events in hemodialysis patients. <i>Frontiers in Immunology, 2018</i>	96
Chapter 6	Administration of intravenous iron preparations induces complement activation <i>in-vivo</i> . <i>Frontiers in Immunology, 2019</i>	120
Chapter 7	Soluble CD59 in peritoneal dialysis: a potential biomarker for peritoneal membrane function. <i>Journal of Nephrology, 2020</i>	140
Chapter 8	Peritoneal dialysis independently induces local and systemic complement activation via distinct pathways. <i>In preparation</i>	164
Chapter 9	Summary, discussion and future perspectives	198
Appendices	Samenvatting en Discussie	210
	Sumário e Discussão	218
	Acknowledgments	226
	About the author	229
