On the origins of pediatric brain cancer

Exploring the role of genome instability
in development and disease

Irena Bočkaj

The work described in this thesis was conducted at the Departments of Pediatric Oncology and Hematology/Pediatrics and the European Research Institute for the Biology of Ageing (ERIBA), University Medical Centre Groningen, University of Groningen, the Netherlands.

Cover design & Layout: Irena Bočkaj

On the origins of pediatric brain cancer

Exploring the role of genome instability in development and disease

PhD thesis

to obtain the degree of PhD at the
University of Groningen
on the authority of the
Rector Magnificus Prof. C. Wijmenga
and in accordance with
the decision by the College of Deans.

This thesis will be defended in public on

Monday 15 February 2021 at 11.00 hours

by

Irena Bočkaj

born on 19 September 1988
in Mostar, Bosnia & Herzegovina

Supervisor

Prof. E.S.J.M. de Bont

Co-supervisor

Dr. S.W.M. Bruggeman

Assessment Committee

Prof. H.J.P. te Riele

Prof. B.J.L. Eggen

Prof. M.A.T.M. van Vugt

Table of Contents

Chapter 1

General Introduction: Pediatric Brain Cancers & Brain Development 6

On the origins of pediatric brain cancer: when normal development goes astray.

Scope of this thesis 31

Chapter 2

The Developing Brain & Genome Instability 40

Vulnerability to aneuploidy in the developing brain: a path to cancer?

Chapter 3

Pediatric Medulloblastoma & Cell-of-origin 60

The developmental stage of the medulloblastoma cell-of-origin is maintained in cancer and restricts Hedgehog pathway usage and drug sensitivity.

Chapter 4

Pediatric Medulloblastoma & Genome Instability 103

A role for genomic instability in pediatric medulloblastoma: modelling medulloblastoma using CIN as a driver.

Chapter 5

Pediatric high-grade glioma & Cell-of-origin 134

In quest of the pontine glioma cell-of-origin.

Chapter 6

Pediatric High-Grade Glioma & Genome Instability 160

The H3.3K27M oncohistone affects replication stress outcome and provokes genomic instability in pediatric glioma.

Chapter 7

General discussion & Conclusion 194

Appendices

Revisiting the chromosome segregation checkpoint (*Bioessays* 2017) 218

List of abbreviations 220

Dutch summary 222

Acknowledgements 226
