Applications of biophysical methods in small-molecule modulators targeting protein function

PhD thesis

to obtain the degree of PhD at the
 University of Groningen
 on the authority of the
 Rector Magnificus Prof. C. Wijmenga
 and in accordance with
 the decision by the College of Deans.

This thesis will be defended in public on

Friday 12 February 2021 at 12.45 hours

by

Wenjia Wang

born on 2 June 1989
 in Heilongjiang, China

Supervisors

Prof. A.S.S. Dömling

Prof. M.R. Groves

Assessment Committee

Prof. J.M. van Dijl

Prof. T.A. Holak

Prof. D.J. Slotboom

Contents

1	Introduction	2
2	Artificial Macrocycles as IL17A/IL17RA Antagonists	11
3	Ligand-Directed Diazotransfer Chemistry Reveals Structural Metal-Dependent Features of Bovine Carbonic Anhydrase II	23
4	The Crystal Structure of the Plasmodium falciparum PdxK Provides an Experimental Model for Pro-Drug Activation	59
5	Amino acid Derivatives as a Scaffold for the Discovery of IL17A binders	80
6	Structure-Activity Based IL17A/IL17RA Small-Molecule Antagonists Discovery	99
7	The human milk oligosaccharides 3-FL, LNnT, and LDFT attenuate TNF- α induced inflammation in fetal intestinal epithelial cells through shedding or interacting with TNF receptor 1	114
