Exploring cellular and molecular mechanisms underlying endothelial heterogeneity in sepsis

PhD thesis

to obtain the degree of PhD at the
 University of Groningen
 on the authority of the
 Rector Magnificus Prof. C. Wijmenga
 and in accordance with
 the decision by the College of Deans.

This thesis will be defended in public on
 Wednesday 24 March 2021 at 14.30 hours

by

Dayang Erna Zulaikha

born on 7 July 1986
 in Sarawak, Malaysia

Supervisor

Prof. G. Molema

Co-supervisors

Dr. J. Moser

Dr. M. van Meurs

Assessment committee

Prof. S.P. Berger

Prof. J. van Buul

Prof. P. Kümpers

Paranymphs

M. Luxen

T. Kuiper

TABLE OF CONTENTS

CHAPTER 1	9
Introduction and Aim of the Thesis	
CHAPTER 2	25
Review: Why do organs fail differently in sepsis? Endothelial heterogeneity and organ-specific failure phenotypes in sepsis	
<i>Manuscript in preparation</i>	
CHAPTER 3	51
Organ- and microvascular bed-specific endothelial responses and leukocyte infiltration in mice with abdominal sepsis	
<i>Work in progress</i>	
CHAPTER 4	81
Identification of Lipopolysaccharide-activated endothelial subpopulations with distinct inflammatory phenotypes and regulatory signaling mechanisms	
<i>Frontiers in Immunology (2019), 10: 1169</i>	
CHAPTER 5	113
Characterization of the heterogeneous response of endothelial subpopulations to Lipopolysaccharide by gene expression profiling	
<i>Work in progress</i>	
CHAPTER 6	129
Pharmacological inhibition of Focal adhesion kinase 1 (FAK1) and Anaplastic lymphoma kinase (ALK) identified via kinome profile analysis attenuates Lipopolysaccharide-induced endothelial inflammatory activation	
<i>Biomedicine & Pharmacotherapy (2021), 133: 111073</i>	

CHAPTER 7	165
Summary, conclusions, and future perspectives	
APPENDICES	179
Nederlandse samenvatting
