Eco-evolutionary routes towards animal sociality

Ecology, behaviour and communication in communal breeding of
 burying beetles

Proefschrift

ter verkrijging van de graad van doctor aan de
 Rijksuniversiteit Groningen
 op gezag van de
 rector magnificus prof. dr. C. Wijmenga
 en volgens besluit van het College voor Promoties.

De openbare verdediging zal plaatsvinden op
 vrijdag 12 maart 2021 om 14.30 uur

door

Long Ma

geboren op 5 februari 1989
 te Gansu, P.R. China

Promotor

Prof. dr. J. Komdeur

Copromotor

Dr. M. Hammers

Beoordelingscommissie

Prof. dr. J.C. Billeter

Prof. dr. M. Taborsky

Prof. dr. R.M. Kilner

Contents

Chapter 1. General introduction.....	1
Chapter 2. When and why do burying beetles share a carcass? The impact of ecological and intrinsic factors on group living.....	23
Chapter 3. The impact of prior breeding experience and social status on group interactions and fitness in a communally breeding species.....	47
Chapter 4. Sex differences in immediate and carry-over effects of communal breeding in a burying beetle.....	71
Chapter 5. Burying beetles tolerate each other in a tug-of-war competition.....	89
Box A. Insect cuticular hydrocarbons: bio-synthesis, biological functions and evolution.....	119
Chapter 6. Group-living individuals form a temporarily-coordinated organization via chemical signals.....	125
Box B. The evolution of animal sociality: genes and social behaviour.....	153
Chapter 7. Keeping up with environmental change: the importance of sociality.....	159
Chapter 8. General discussion and synthesis.....	171
