Sensors@Work

Towards monitoring of physical workload
for sustainable employability

Charissa Roossien

This research was funded by the European Regional Development Fund, a co-founder of INCAS3 (Assen, The Netherlands), an independent, non-profit research institute focused on technology from science and industry, the province and municipality of Groningen, and the province of Drenthe, Grant [number T-3036, 2013].

The PhD training was facilitated by School of Health Research (SHARE) and the Graduate School of Medical Sciences, University Medical Center Groningen, the Netherlands.

ISBN: 978-94-6419-156-1.

Printed by: Gildeprint, Enschede, the Netherlands

Sensors@Work

Towards monitoring of physical workload for sustainable
 employability

PhD thesis

to obtain the degree of PhD at the University of Groningen
 on the authority of the
 Rector Magnificus Prof. C. Wijmenga
 and in accordance with the decision by the College of Deans.

This thesis will be defended in public on

Wednesday 24 March 2021 at 12.45 hours

by

Charlotte Christina Roossien

born on 27 August 1988
 in Assen

Supervisors

Prof. M.F. Reneman

Prof. G.J. Verkerke

Assessment Committee

Prof. S. Brouwer

Prof. J.S. Rietman

Prof. H. Hermens

Content

1	General introduction	7
2	Mechanical workload Can a smart chair improve the sitting behaviour of office workers?	27
3	Mechanical workload Automatically determining lumbar load during physically demanding work: an in-vivo validation study	47
4	Energetic workload Patent application of an instrument, system and method for use in respiratory exchange ratio measurement	74
5	Energetic workload Can breathing gases be analysed without a mouth mask? Proof-of-concept and concurrent validity of a newly developed design with a mask-less headset?	97
6	Heat exposure Monitoring core temperature of firefighters to validate a wearable non-invasive core thermometer in different types of protective clothing: concurrent in-vivo validation	141
7	Heat exposure Evaluation of a wearable non-invasive thermometer for monitoring ear canal temperature during physically demanding work	169
8	Ethics Ethics in Design and Implementation of Technologies for Workplace Health Promotion	202
9	General discussion	231
A	Appendix I Evaluation of a wearable non-invasive thermometer for monitoring inner-ear temperature during physically demanding work	255
	Appendix II SPRINT@Work	267
	Summery	275
	Samenvatting	279
	Acknowledgments	283
	About the author	289
	SHARE	295
