March 2021

The research described in this thesis was performed collectively at the Department of Biomedical Engineering (BME) and Biomedical Sciences of Cells & Systems (BSCS), University Medical Center Groningen (UMCG), University of Groningen (RUG).

This PhD work was financially supported by the Dutch Technology Foundation TTW, which is part of the Netherlands Organization for Scientific Research and partly funded by the Ministry of Economic Affairs. Part of the work was funded by Stichting Techniek en Wetenschap (STW) and de Cock-Hadders Stichting. The individual NAMASTE fellowship was funded by the Erasmus Mundus India-EU mobility consortium.
