Biological interactions in depression: Insights from preclinical studies

PhD thesis

to obtain the degree of PhD at the
University of Groningen
on the authority of the
Rector Magnificus Prof. C. Wijmenga
and in accordance with
the decision by the College of Deans.

This thesis will be defended in public on

Monday 19 April 2021 at 14.30 hours

by

Rodrigo Moraga Amaro

born on 26 May 1989
in Quinta Normal, Chile

Supervisors

Prof. E.F.J. de Vries
Prof. R.A.J.O. Dierckx

Co-supervisors

Dr. J. Doorduyn
Dr. J. Stehberg

Assessment Committee

Prof. J. Booij
Prof. I.E.C. Sommer
Prof. A. Dagnino-Subiabre

Table of contents

Chapter 1. Introduction.....	6
Chapter 2. Sex steroid hormones and brain function: PET imaging as a tool of research.....	40
Chapter 3. Ovariectomy-induced depressive-like behavior and brain glucose metabolism changes in female rats are not affected by chronic mild stress.....	68
Chapter 4. Ketamine as an antidepressant: effects on stress-induced neuroinflammation	88
Chapter 5. Comparison of TSPO PET tracers [¹¹ C]-PK11195 and [¹¹ C]-PBR28 for measurement of neuroinflammation in the repeated social defeat rat model of depression	110
Chapter 6. Exploring the link between caffeine and neuroinflammation using the repeated social defeat stress model in the rat.....	128
Chapter 7. Enhanced dopamine D ₂ /D ₃ receptor and serotonin transporter availability after recovery from repeated social defeat induced anhedonic behavior.....	154
Chapter 8. Prenatal Fluoxetine impairs non-hippocampal but not hippocampal memory in adult male rat offspring.....	176
Chapter 9. Discussion.....	200
Chapter 10. English summary.....	226
Chapter 11. Nederlandse Samenvatting.....	234
Chapter 12. Resumen en español.....	242
Chapter 13. Acknowledgements/Agradecimientos.....	252
List of publications	261
