TABLE OF CONTENTS

Chapter 1	General introduction	9
 Part I The characteristics of the early motor repertoire		
Chapter 2	A comparison of the early motor repertoire of very preterm infants and term infants. <i>Submitted</i>	23
 Part II The predictive value of the early motor repertoire for neurodevelopment		
Chapter 3	Early motor repertoire in very preterm children is associated with neurodevelopment at 8 years. <i>Submitted</i>	41
Chapter 4	The early motor repertoire of preterm infants is associated with intelligence in young adulthood. <i>Submitted</i>	65
Chapter 5	The early motor repertoire of preterm infants and cognition in young adulthood. <i>Submitted</i>	85
Chapter 6	The association between the early motor repertoire and language development in term children born after normal pregnancy. <i>Early Hum Dev. 2017 Aug; 111:30-35.</i>	107
 Part III Exploring the scope of the assessment of the early motor repertoire		
Chapter 7	A parechovirus type 3 infection with presumed intrauterine onset: poor neurodevelopmental outcome. <i>Neonatology. 2020 Sep; 1-5.</i>	129
Chapter 8	The early motor repertoire of infants with inherited metabolic diseases of the intoxication type. <i>Submitted</i>	141
Chapter 9	General discussion	165
