Quantifying and mapping bioenergy potentials in China

Spatiotemporal analysis of technical, economic, and sustainable biomass supply potentials for optimal biofuel supply chains in China

Bingquan Zhang

The work described in this thesis was performed at Integrated Research on Energy, Environment and Society (IREES), Energy and Sustainability Research Institute Groningen (ESRIG), Faculty of Science and Engineering, University of Groningen, The Netherlands. The work was financially supported by the China Scholarship Council and partly by the University of Groningen.

Printing of this thesis was financially supported by the University of Groningen and the Graduate School of Science and Engineering.

Quantifying and mapping bioenergy potentials in China

Spatiotemporal analysis of technical, economic, and sustainable
biomass supply potentials for optimal biofuel supply chains in China

PhD thesis

to obtain the degree of PhD at the
University of Groningen
on the authority of the
Rector Magnificus Prof. C. Wijmenga
and in accordance with
the decision by the College of Deans.

This thesis will be defended in public on

Friday 30 April 2021 at 14.30 hours

by

Bingquan Zhang

born on 28 February 1992
in Shandong, China

Supervisor

Prof. A.P.C. Faaij

Co-supervisor

Prof. T. Lin

Assessment Committee

Prof. H.C. Moll

Prof. H.M. Junginger

Prof. M. Khanna

Table of contents

Chapter 1 Introduction

1.1 The need for biofuel in China	2
1.2 Cautious production of biofuel in China	3
1.3 Gaps in knowledge	6
1.3.1 Energy crops from marginal land.....	7
1.3.2 Agricultural residues and soil organic carbon.....	8
1.3.3 Biofuel supply chain	9
1.4 Objective, research questions, and thesis outline	10
References Chapter 1	14

Chapter 2 Modelled spatial assessment of biomass productivity and technical potential of *Miscanthus× giganteus*, *Panicum virgatum* L. and *Jatropha* on marginal land in China — Yield assessment of energy crops in China

Abstract	22
2.1 Introduction.....	23
2.2 Materials and Methods	25
2.2.1 Identification of marginal land technically available for energy crop production	25
2.2.2 Species selection	27
2.2.3 Model description and selection	28
2.2.4 Technical potential of energy crop production on marginal land	31
2.3 Data Input.....	33
2.3.1 Spatial data for the identification of marginal land	33
2.3.2 Yield of energy crop cultivation on marginal land.	33
2.4 Results	34
2.4.1 Marginal land technically available for energy crop production	34
2.4.2 Yields of energy crop cultivation on marginal land.....	36
2.4.3 Technical potential of energy crop plantation on marginal land	41
2.5 Discussion	45
2.5.1 Comparison of yield prediction models for crops	45

2.5.2 Identification of marginal land technically available for biomass production	45
2.5.3 Yields and technical potential estimation by models	46
2.6 Acknowledgements	49
References Chapter 2	50
Appendix A2. Supplementary data	54

Chapter 3 Spatiotemporal assessment of farm-gate production costs and economic potential of *Miscanthus × giganteus*, *Panicum virgatum* L., and *Jatropha* grown on marginal land in China — Economic assessment of energy crops in China

Abstract	70
3.1 Introduction	71
3.2 Materials and Methods	74
3.2.1 Essential background information for this study	74
3.2.2 Calculation of the farm-gate production cost	75
3.2.3 Economic potential of energy crop production on marginal land	81
3.2.4 Sensitivity analysis	82
3.2.5 Data for the yield and the technical potential of energy crop	82
3.3 Results	82
3.3.1 Farm-gate production cost of energy crop from marginal land	82
3.3.2 Economic potential of energy crop production on marginal land	87
3.3.3 Sensitivity analysis	90
3.4 Discussion	93
3.5 Acknowledgements	97
References Chapter 3	98

Chapter 4 Spatially explicit analyses of sustainable agricultural residue potential for bioenergy in China under various soil and land management scenarios

Abstract	102
4.1 Introduction	103
4.2 Methodology	108
4.2.1 Estimation of the theoretical potential of residues	108

4.2.2 Estimation of the residue amount required for maintaining soil health	110
4.2.3 Estimation of the sustainable potential of residues	111
4.2.4 Scenarios	112
4.2.5 Calculation of on-farm costs for residues collection	115
4.2.6 Estimation of the economic potential of agricultural residues.....	119
4.3 Results and discussion	120
4.3.1 Sustainable agricultural residue potential	120
4.3.2 On-farm costs for residue collection	124
4.3.3 Economic potential of agricultural residues	126
4.3.4 Competing use of agricultural residues.....	127
4.3.5 Uncertainties in biomass supply.....	128
4.3.6 Practical implications of this study	129
4.4 Conclusions.....	130
4.5 Acknowledgements	131
References Chapter 4	132
Appendix A4. Supplementary data	136

Chapter 5 Economic optimization for dual-feedstock lignocellulosic-based sustainable biofuel supply chain considering greenhouse gas emission and soil carbon stock

Abstract	142
5.1 Introduction.....	143
5.2 Methodology	146
5.2.1 Biomass supply and supply chain configuration.....	146
5.2.2 Modelling framework	147
5.2.3 Optimization procedure	149
5.3 Case study	150
5.3.1 Set up of the case study	150
5.3.2 Scenario.....	152
5.3.3 Input data	153
5.4 Results and discussion	157
5.4.1 Environmental optimization	157

5.4.2 Optimal layout under economic optimization.....	158
5.4.3 Economic performance	160
5.4.4 GHG emission performance	163
5.4.5 Comprehensive performance of scenarios.....	164
5.4.6 Sensitivity analysis.....	165
5.4.7 Uncertainty and future research recommendation.....	167
5.5 Conclusions.....	168
5.6 Acknowledgements	169
References Chapter 5	170
Appendix A5. Detailed model description.....	175
Model formulas.....	175
Nomenclature	177
Appendix B5. Supplementary data	179
Chapter 6 Summary and conclusions	
6.1 Research context	186
6.2 Objectives and research questions.....	188
6.3 Summary of chapters	189
6.4 Main findings and conclusions	196
6.4.1 Research question I	196
6.4.2 Research question II	199
6.4.3 Research question III	202
6.5 Recommendations.....	204
References Chapter 6	208
Chapter 7 Samenvatting en conclusive	214
Appendix	217
Acknowledgments	218
List of publications.....	222
About the author.....	223
