Ultrasound-triggered Release and Activation of Drugs and Biomacromolecules from Nucleic Acid Scaffolds

Pengkun Zhao

Ultrasound-triggered Release and Activation of Drugs and Biomacromolecules from Nucleic Acid Scaffolds

Pengkun Zhao

PhD thesis

University of Groningen

Zernike Institute PhD thesis series 2021-11

ISSN 1570-1530

The research described in this thesis was performed in Polymer Chemistry and Bioengineering group at Zernike Institute for Advanced Materials, University of Groningen, the Netherlands. This work was financially supported by the China Scholarship Council (CSC), the University of Groningen, the Netherlands Organization for Science Research (NWO) and European Research Council (ERC).

Ultrasound-triggered Release and Activation of Drugs and Biomacromolecules from Nucleic Acid Scaffolds

PhD thesis

to obtain the degree of PhD at the
University of Groningen
on the authority of the
Rector Magnificus Prof. C. Wijmenga
and in accordance with
the decision by the College of Deans.

This thesis will be defended in public on

Friday 7 May 2021 at 14.30 hours

by

Pengkun Zhao

born on 21 December 1990
in Henan, China

Supervisor

Prof. A. Herrmann

Co-supervisor

Prof. G. Portale

Assessment Committee

Prof. R. Sijbesma

Prof. C. Bolm

Prof. G. Roelfes

Dedicated to my beloved parents

Contents

1. Remotely triggered release and activation of drugs from nucleic acid-mediated platforms.....3

1.1 Introduction	4
1.2 Electric field-triggered release	5
1.2.1 Electroporation-induced release	6
1.2.2 Redox reaction induced release	7
1.3 Magnetic force-triggered release.....	8
1.3.1 Magnetic guidance	8
1.3.2 Magnetic hyperthermia induced release	9
1.4 Light-triggered release	10
1.4.1 Photothermal activation	11
1.4.2 Photochemical activation.....	12
1.4.3 Photoisomerization activation	15
1.5 Ultrasound-triggered release	17
1.5.1 Sonoporation	17
1.5.2 Cavitation.....	18
1.5.3 Phase transition	19
1.6 Multiple stimuli-triggered release	19
1.7 Conclusion.....	21
1.8 Thesis motivation and overview	22
References	26

2. Ultrasound promoted drug activation of aminoglycoside antibiotics from poly-aptamers31

Abstract.....	32
2.1 Introduction	33
2.2 Results and discussion	35
2.3 Conclusions	40
2.4 Experimental sections	40
References	51

3. Activation of the catalytic activity of thrombin by ultrasound53

Abstract	54
3.1 Introduction	55
3.2 Results and discussion	57
3.3 Conclusions	62
3.4 Experimental sections	62
References	72

4. Force-controlled self-assembly of nanoparticles and its application for protein activation77

Abstract	78
4.1 Introduction	79
4.2 Results and discussion	80
4.3 Conclusions	84
4.4 Experimental sections	85
References	91

5. Colorimetric assay to detect interactions between proteins and nucleic acids93

Abstract	94
5.1 Introduction	95
5.2 Results and discussion	97
5.3 Conclusions	102
5.4 Experimental sections	102
References	108
