Computer-aided Ionic Liquids Design for Separation Processes

Daili Peng

university of
 groningen

faculty of science
and engineering

The work described in this thesis was conducted at the Department of Chemical Engineering, Engineering and Technology Institute Groningen (ENTEg), University of Groningen, the Netherlands.

This research is financially supported by China Scholarship Council (CSC).

Computer-aided Ionic Liquids Design for Separation Processes

PhD thesis

to obtain the degree of PhD at the
University of Groningen
on the authority of the
Rector Magnificus Prof. C. Wijmenga
and in accordance with
the decision by the College of Deans.

This thesis will be defended in public on

Monday 17 May 2021 at 12:45 hours

by

Daili Peng

born on 7 May 1991
in Hubei, China

Supervisors

Prof. F. Picchioni

Prof. H.J. Heeres

Assessment committee

Prof. J. Yue

Prof. P.P. Pescarmona

Prof. M.N. Kobra

Dedicated to my beloved family.

谨以此书献给我挚爱的家人

Table of Contents

Introduction.....	1
1. Ionic liquids	2
2. Computer-aided ionic liquids design.....	5
3. Thermodynamic models	8
4. Physical properties and toxicity.....	22
5. Solving the CAILD problem	29
6. Aim and scope of this work.....	32
Abbreviations.....	34
References	36
Prediction of toxicity of Ionic Liquids based on GC-COSMO method	45
Abstract.....	45
1. Introduction	46
2. Methodology.....	48
3. Results and discussion	57
4. Conclusion	68
Supporting Information	69
References	71
Computer-aided ionic liquids design and experimental validation for benzene-cyclohexane separation	75
Abstract.....	75
1. Introduction	76
2. CAILD	79
3. Experimental.....	85
4. Results and discussions	87
5. Conclusions	94
Nomenclature.....	95
Supporting Information	96
References	99
Biogas upgrading — computer-aided ionic liquid absorbent design and process evaluation.....	103
Abstract.....	103
1. Introduction	104
2. Methodology.....	107
3. Results and discussions	115
4. Conclusion	124
Nomenclature.....	125
References	127

A hierarchical hybrid method for screening ionic liquid solvents for extractions exemplified by the extractive desulfurization process	133
Abstract.....	133
1. Introduction	134
2. Method details	137
3. Case study for extractive desulfurization	142
4. Conclusions	154
Nomenclature.....	155
Supporting Information	157
References	161
Summary.....	177
Samenvatting	180
List of publications.....	184
Acknowledgement	185
