Applying lipidomics strategies to study lipid metabolic diseases

Wenxuan Zhang

The research described in this thesis was carried out at the Department of Pediatrics, Center for Liver, Digestive and Metabolic Disease, University Medical Center Groningen, Groningen, the Netherlands.

The studies described in this thesis were financially supported by the SysMed Grant from the University Medical Center Groningen.

The printing of this dissertation was financially supported by:
University of Groningen (RuG)
University Medical Center Groningen (UMCG)
Groningen University Institute of Drug Exploration (GUIDE)

Cover design: Guus Gijben | proefschrift-aio.nl

**Applying lipidomics strategies to study
lipid metabolic diseases**

PhD thesis

to obtain the degree of PhD at the
University of Groningen
on the authority of the
Rector Magnificus Prof. C. Wijmenga
and in accordance with
the decision by the College of Deans.

This thesis will be defended in public on

Monday 10 May 2021 at 12.45 hours

by

Wenxuan Zhang

born on 22 September 1990
in Xi'an, China

Supervisors

Prof. F. Kuipers

Prof. R.P.H. Bischoff

Prof. D.J. Reijngoud

Assessment Committee

Prof. F.J. van Spronsen

Prof. J. Heeren

Prof. C. Barbas

Table of Content

Introduction - Chapter 1	9
---------------------------------	----------

Part I	Evaluation of lipid extraction systems
---------------	---

Chapter 2	Omics technology: lipidomics and its pitfalls during the preanalytical stage	27
Chapter 3	One- vs two-phase extraction: re-evaluation of sample preparation procedures for untargeted lipidomics in plasma samples	55

Part II	Application of lipidomics to disease-related studies
----------------	---

Chapter 4	The plasma lipidome of individuals with extreme levels of LDL-c	79
Chapter 5	The role of hepatic fatty-acid oxidation during cold stress: remodeling of whole body energy and lipid metabolism in Acadm-knockout mice.	105
Chapter 6	Low LRH-1 expression in mice promotes development of Western-type diet-induced steatohepatitis and liver fibrosis Multi-omics integration reveals a critical role of LRH-1 in adequate adaptation of hepatic lipid metabolism to nutrient overload	133

Part III	Discussion	
Chapter 7	General discussion	171
