Cellular Stress in Aging and Cancer

PhD thesis

to obtain the degree of PhD at the
University of Groningen
on the authority of the
Rector Magnificus Prof. C. Wijmenga
and in accordance with
the decision by the College of Deans.

This thesis will be defended in public on

Monday 7 June 2021 at 14.30 hours

by

Ines Sturmlechner

born on 27 June 1990
in Krems an der Donau, Austria

Supervisors

Prof. A.J.A. van de Sluis
Prof. B.F. Horazdovsky

Assessment Committee

Prof. F. Kuipers
Prof. G. de Haan
Prof. N. Riksen

Table of contents

Chapter 1	General introduction	7
Chapter 2	Cellular senescence in renal ageing and disease	19
Chapter 3	Two-step senescence-focused cancer therapies	45
Chapter 4	Senescent cells in the development of cardiometabolic disease	63
Chapter 5	p21 produces a bioactive secretome that places stressed cells under immunosurveillance	81
Chapter 6	<i>BubR1</i> allelic effects drive phenotypic heterogeneity in mosaic-variegated aneuploidy progeria syndrome	119
Chapter 7	<i>Ccne1</i> overexpression causes chromosome instability in liver cells and liver tumor development in mice	157
Chapter 8	FoxM1 insufficiency hyperactivates Ect2–RhoA–mDia1 signaling to drive cancer	189
Chapter 9	General discussion	229
Appendices	Summary	241
	Nederlandse samenvatting	245
	Acknowledgements	247
	List of publications	252
	Curriculum vitae	254
